Foreword

THE Home Plan Book is placed in your hands with a firm belief that it will make the selection and fulfillment of your home an exceedingly easy and pleasant experience. Much as you may be lured from one fascinating illustration and floor plan to others, within these pages one house will eventually capture your affections—your Home. Your own individual taste in architecture, requirements in room arrange-

ments, and limitations of budget are designed into at least one of the 49 homes illustrated and described herein.

When you have decided upon the house of your choice, remember that in all likelihood it will be your home for a lifetime. Certainly you will insist upon specialized and reliable guidance in making unaccustomed decisions concerning

SOUND FINANCING

PROPER MATERIALS

RESPONSIBLE BUILDERS

Working blue prints and specifications of any home displayed may be obtained from us, your lumber dealer. These detailed plans and specifications prevent disappointment and unnecessary expense in the shape of extras and omitted details. Minor alterations can be made by the builder in any of the plans shown. These blue prints may be obtained in reverse for exposures fitting special requirements of your lot. Room sizes are shown to assist you in visualizing room proportions; these dimensions are to be read as actual inside measurements.

Competent architects designed these homes. From those submitted 65 have been selected

for the Home Plan Book. A careful balance has been maintained between the important elements in today's concept of charming design, convenient floor plans, and least cost consistent with good construction. These homes possess qualities of resale value. The blue prints are an outgrowth of preliminary plans frequently expressed in model homes; the proving ground has discarded extravagant frills and impractical features.

The Home Plan Book is offered primarily to you in your search for a modest home. Phone or call at our office for further information on home building.

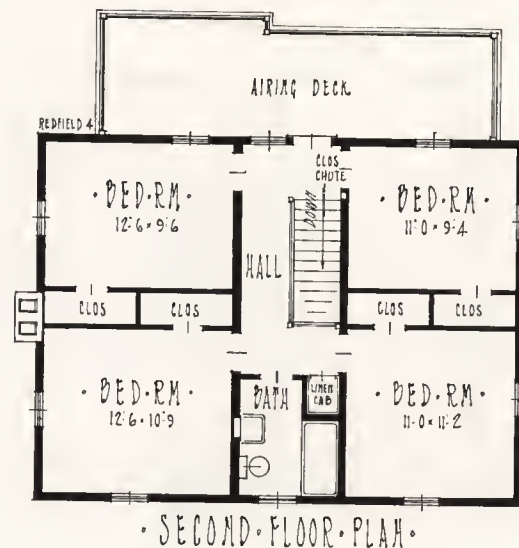

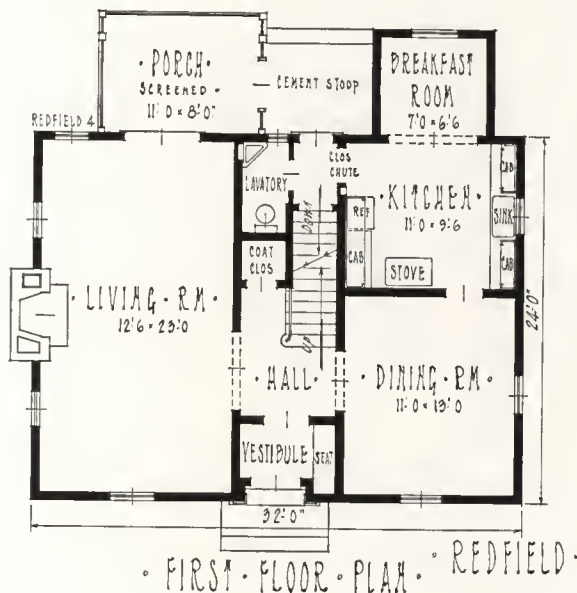

Seven Rooms and Dinette

23,200 Cubic Feet

The Redfield

BUILT around the family, the Redfield is comfortably ample in all eight rooms. Only Colonial design can be so full of rich appeal, yet remain within a modest budget. Salient points:

central stair-hall, full-length living room, closed porch, breakfast room, down-stairs lavatory, plentiful closets, four bedrooms, and airing deck.

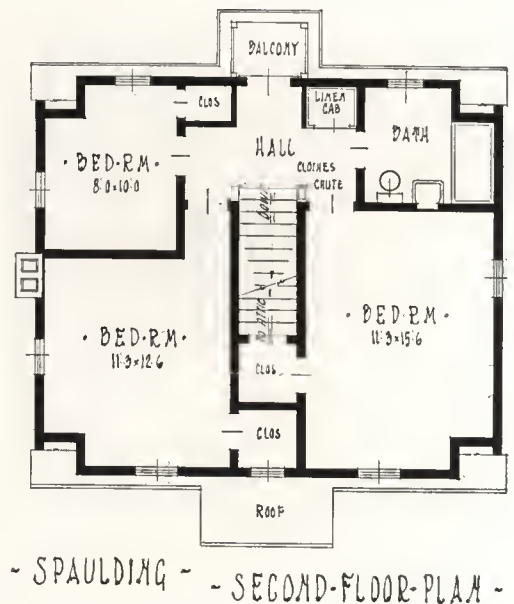

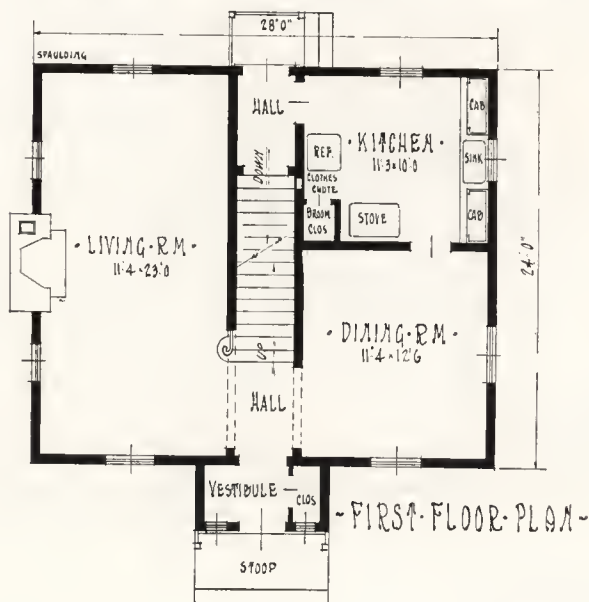

Six Rooms

18,500 Cubic Feet

The Spaulding

THE Spaulding is a fine interpretation of the Dutch Colonial in typical neatness, space economy and attractive design. All rooms are of generous size with detailed conveniences

throughout. This home has earned a secure place in the affections of American families, providing maximum room at very low cost.

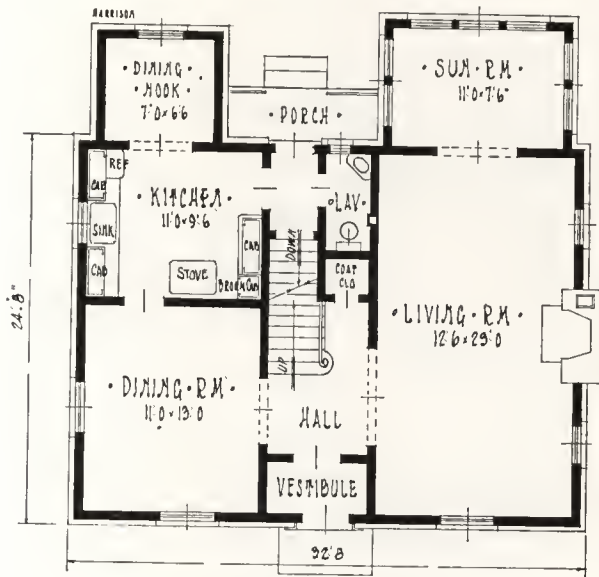

Seven Rooms, Sun Room and Nook

24,800 Cubic Feet

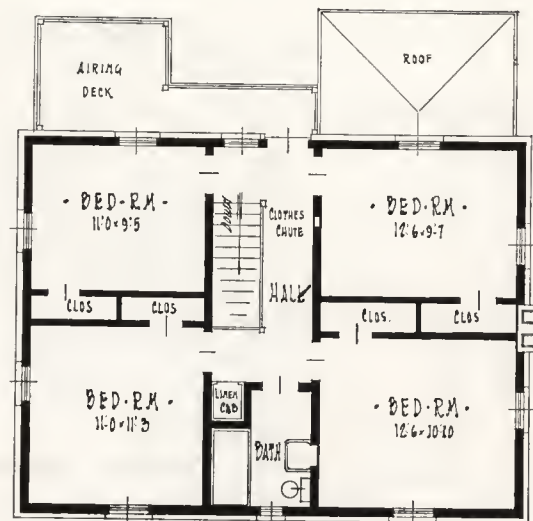

The Harrison

THIS splendid brick Colonial wins instant appreciation of its interesting exterior and every thoughtful detail of the floor plan. The Harrison is a truly fine home, substantial and

compact, with four full size bedrooms. Its conservative construction costs represent a very worthwhile family investment.

- FIRST FLOOR PLAN -

- SECOND FLOOR PLAN -

- HARRISON -

Classification (990-140)

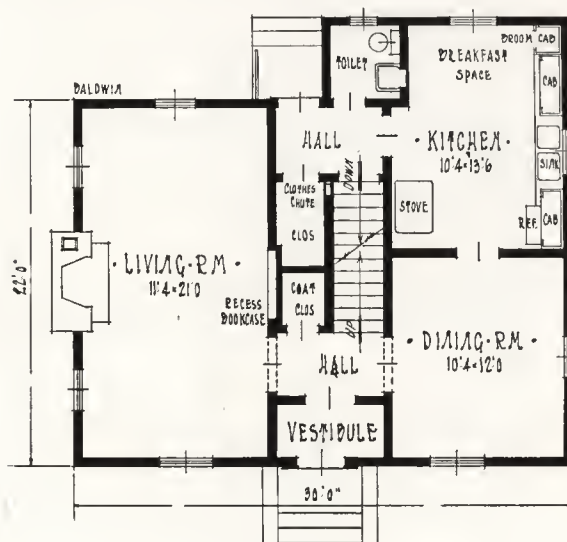

Six Rooms

20,500 Cubic Feet

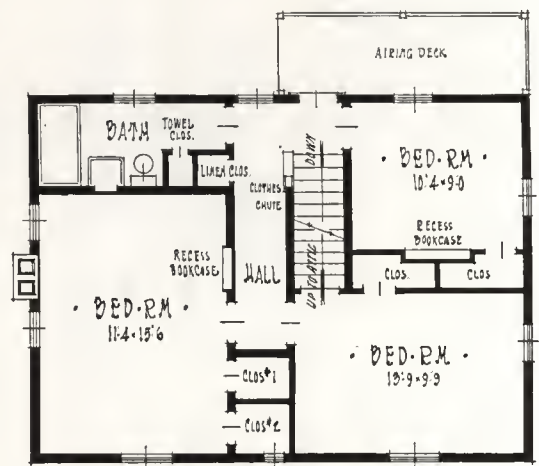

The Baldwin

THE practical charm of Colonial design is reflected in the two-story Baldwin. Every desirable feature a housewife would specify has been drawn into these plans. The large living room and two of the three bedrooms have re-

cessed book shelves, and the master bedroom recognizes masculine rights by having two individual closets. Colonial thrift in planning makes the Baldwin moderate in cost.

~ FIRST-FLOOR-PLAN ~

~ BALDWIN ~
~ SECOND-FLOOR-PLAN ~

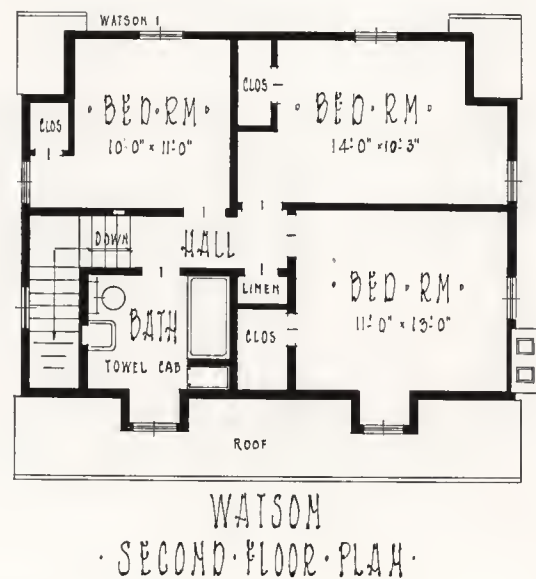

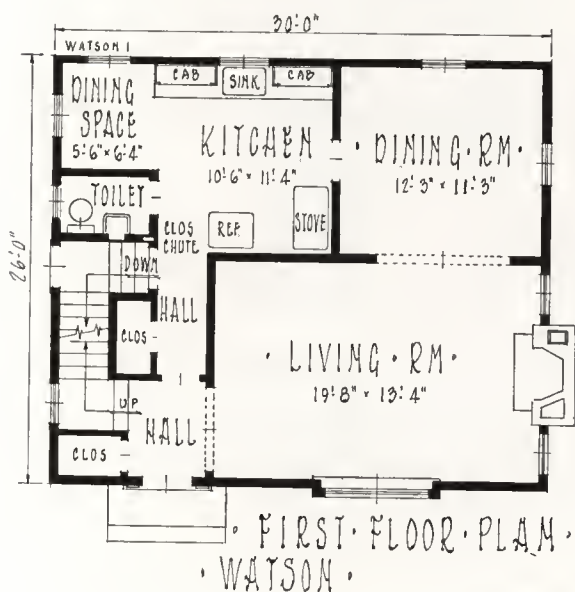

Six Rooms

18,700 Cubic Feet

The Watson

THE Watson is an attractive Cape Cod variation ably adapted to a small foundation. By ingenious planning the rooms are spacious and fitted with many closets. For informal

meals there is a comfortable dining nook. Off the kitchen is a downstairs toilet. In addition, a fireplace and three bedrooms make this moderate cost home most desirable.

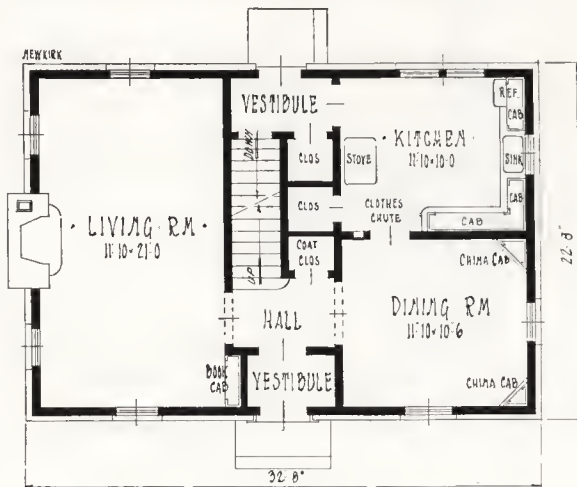

Six Rooms

21,350 Cubic Feet

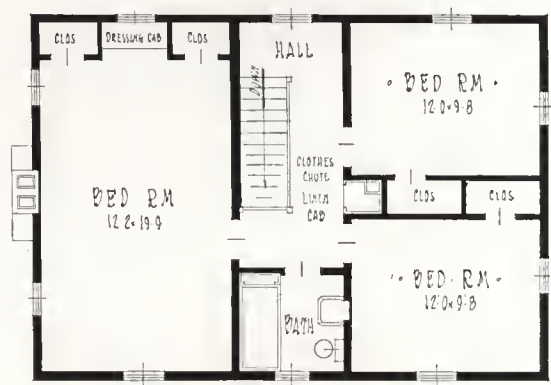

The Newkirk

DISTINCTION and thrift are inseparable elements of American Colonial construction. Brick and clapboards are in the best expression of that style, as displayed by the Newkirk. Corner china cabinets conserve floor space in the dining room and efficiency is the keynote of

the kitchen layout. Extra closets feature this plan; observe the usual closets plus a coat closet, kitchen closet, rear hall closet, and twin closets in the master bedroom. Housing a family in contentment and within reasonable building costs is the achievement of the Newkirk.

~ FIRST FLOOR PLAN ~

~ NEWKIRK ~

~ SECOND FLOOR PLAN ~

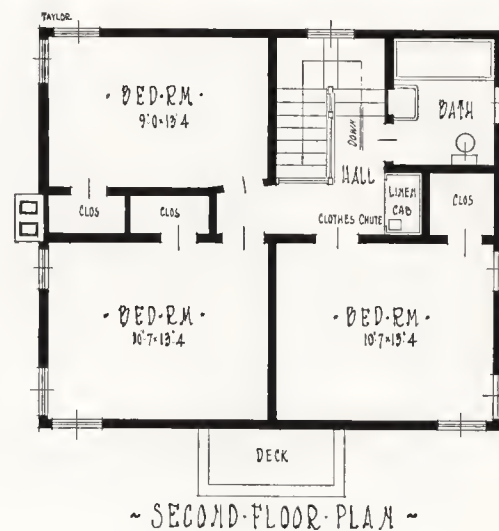

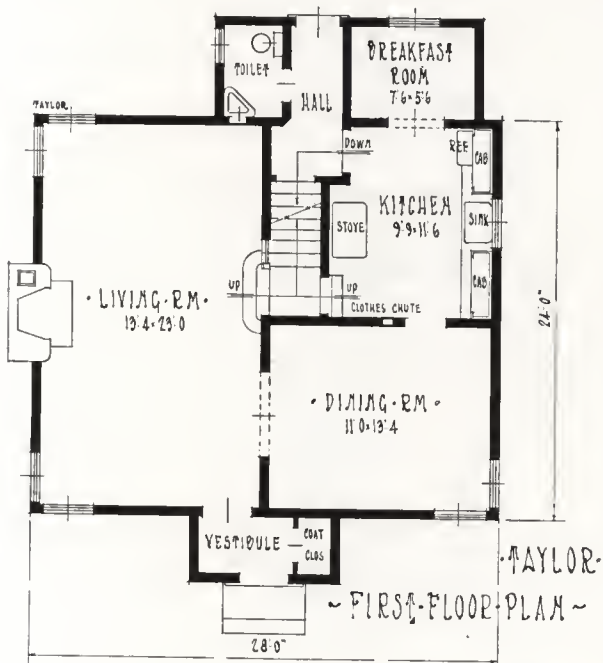

Six Rooms and Nook

17,500 Cubic Feet

The Taylor

THE Taylor presents the distinguished appeal of modern architecture, with careful regard

for holding construction costs to a very low level. Utility and comfort keynote every detail of design. The floor plan speaks for itself in convenience. Here is a practical interpretation of the modern trend.

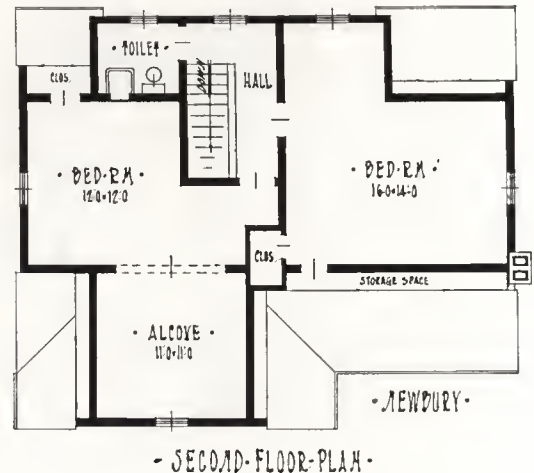

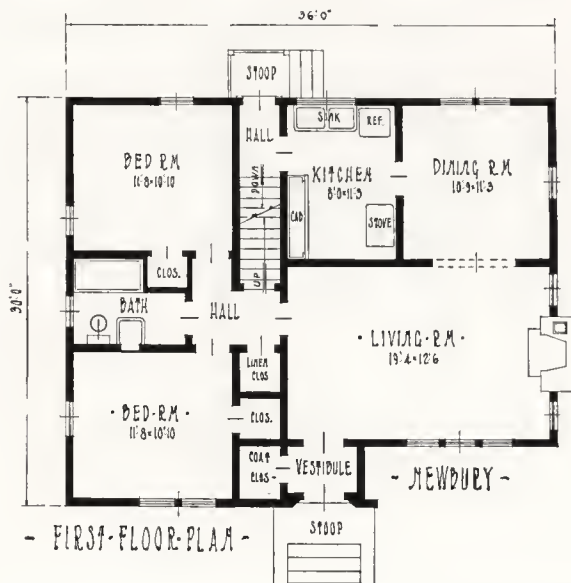

Seven Rooms and Alcove

22,150 Cubic Feet

The Newbury

ONE of the finest of its kind, here is presented a handsome stucco bungalow of the English type. There is a remarkable amount of space in the house. If so wished, the upstairs may be

left unfinished until later, although the plans include two large bedrooms, lavatory and an alcove suitable as a nursery or dressing room. A home of this style meets wide approval, and should be excellent for resale.

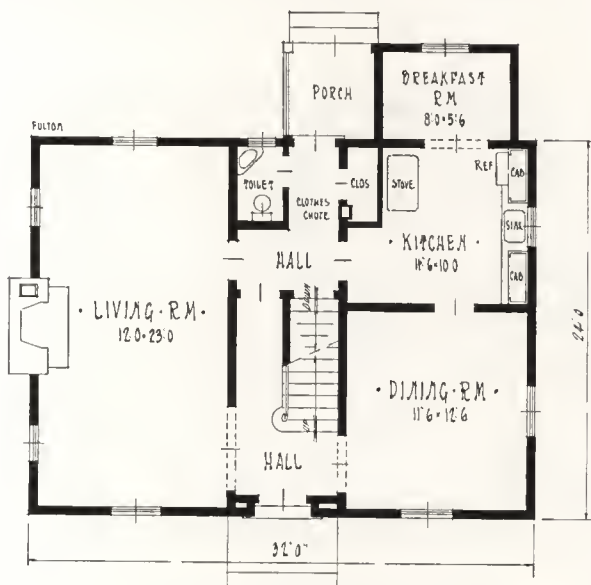

Six Rooms and Breakfast Nook

21,800 Cubic Feet

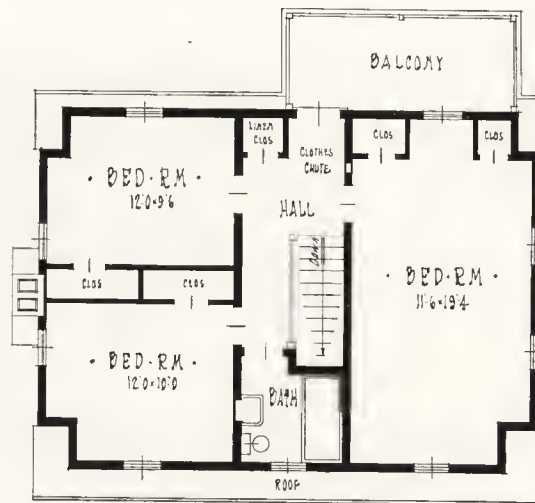

The Fulton

THE basic economy and roomy comfort of the Dutch Colonial is especially in evidence in the Fulton. The plans are particularly considerate of housekeeping requirements, with front and

rear halls. Sound in every respect, the Fulton carefully checks moderate expense with sound construction practice.

- FIRST FLOOR PLAN -

- FULTON -

- SECOND FLOOR PLAN -

Classification 977 - 790

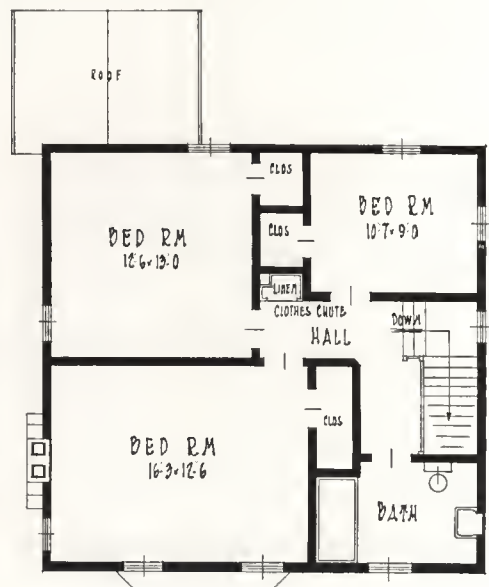

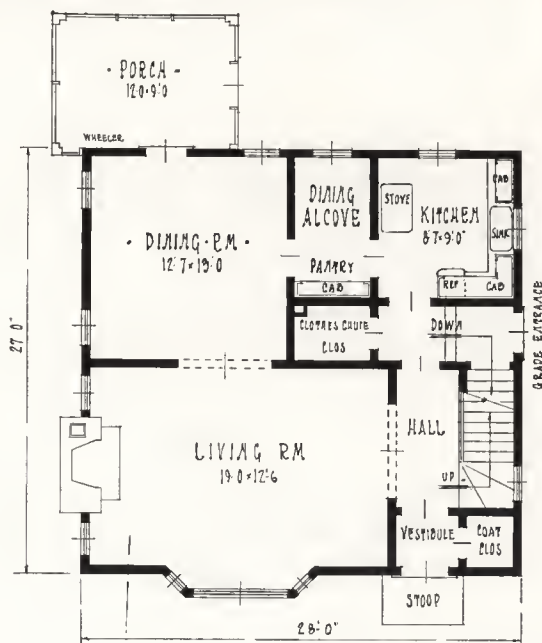

Six Rooms and Dining Alcove

22,600 Cubic Feet

The Wheeler

THE Colonial style of the Wheeler is varied by the use of wide siding for the first story and narrow siding for the second story. The bay window adds greatly to its charm.

The big surprise is the ample proportions throughout the Wheeler—yet its overall dimensions are only 28' x 27'.

- FIRST-FLOOR-PLAN - Classification 972 - 460 - SECOND-FLOOR-PLAN -

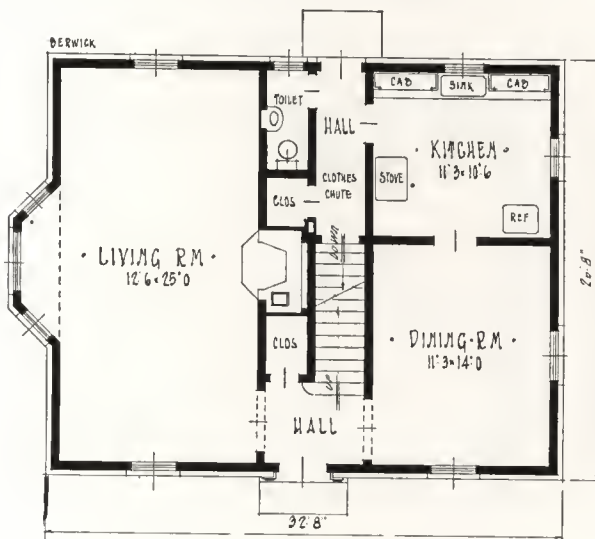

Six Rooms

19,400 Cubic Feet

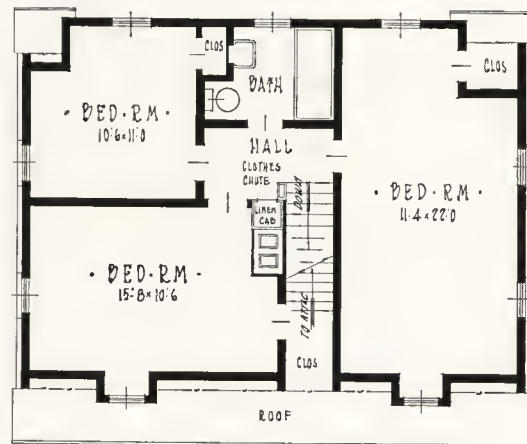

The Berwick

COMMON brick and Cape Cod design conspire to achieve six charming rooms in good proportions—far more than usually confined within such conservative foundation dimensions. Full length of the house, the living room is

exceptionally attractive; the fireplace is balanced by a delightful bay window. Attic storage is accessible through the second bedroom. The Berwick is outstanding for real economy and character in design.

~ FIRST-FLOOR-PLAN ~

DERWICK ·
SECOND-FLOOR-PLAN ·

Classification (980-980)

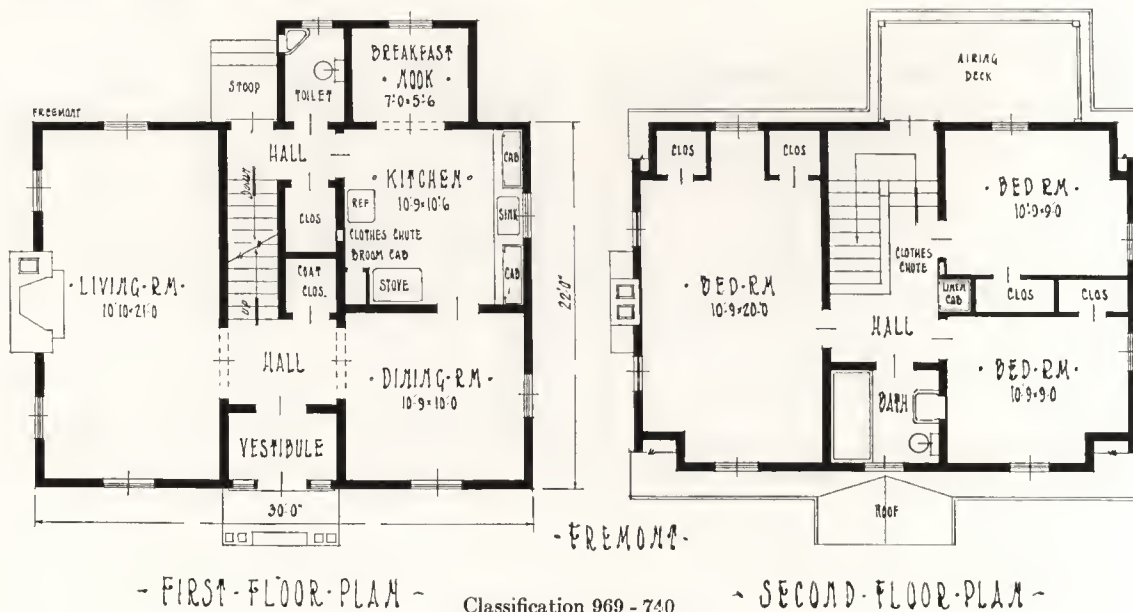

Six Rooms and Breakfast Nook

19,750 Cubic Feet

The Fremont

THE basic reason behind the high favor for the Dutch Colonial points to the large capacity second floor permitted by the characteristic roof design. The first floor is complete with an extra closet and lavatory off the rear

hall. Features throughout the house have been more generously planned in the Fremont than appear from judging by the actual construction cost.

Six Rooms and Porch

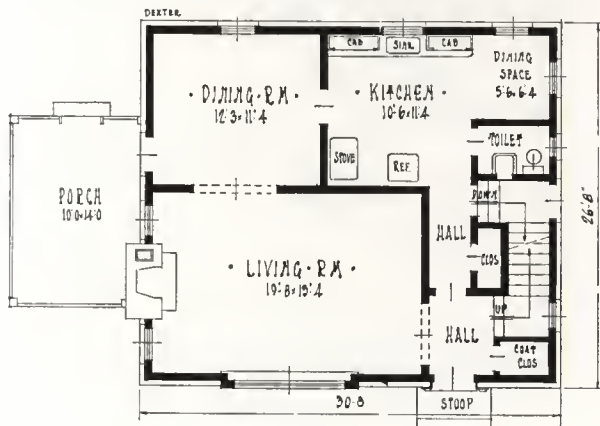

17,900 Cubic Feet

The Dexter

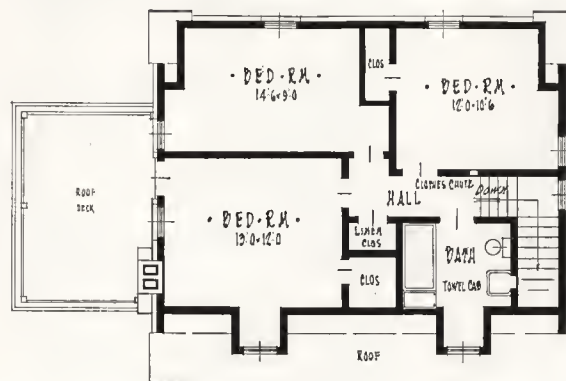

Most interesting is this adaptation of Cape Cod design, shown in brick veneer; stained shingles or wide clapboards would be equally appropriate. The outward charm springs from the restraint in entrance detail and the multi-paned expanse of the landscape window. From roof deck to screens, the lines of the porch carry out the sturdy character of the Cape Cod idea. Typical of the type, the floor plan is very com-

compact, with real convenience and space economy. No detail has been overlooked to make the Dexter thoroughly complete.

Considering the unusual number of comfortable rooms for the ground dimensions utilized, this delightful home is not expensive to build. Every detail specified serves a useful purpose, and the house represents an investment surprisingly moderate.

- FIRST FLOOR PLAN -

- DEXTER -
- SECOND FLOOR PLAN -

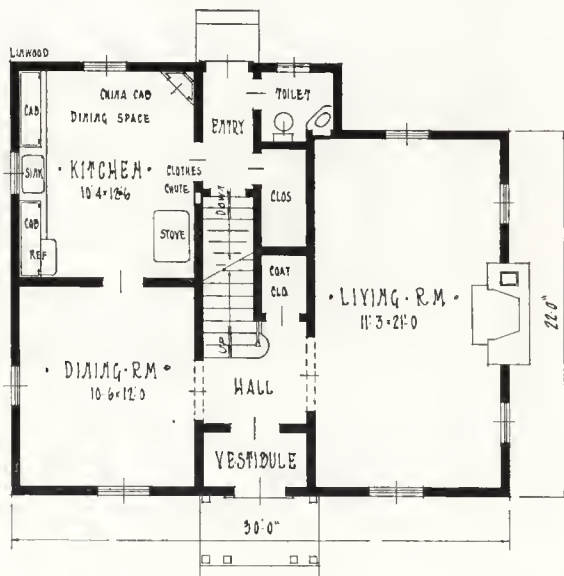

Six Rooms

20,580 Cubic Feet

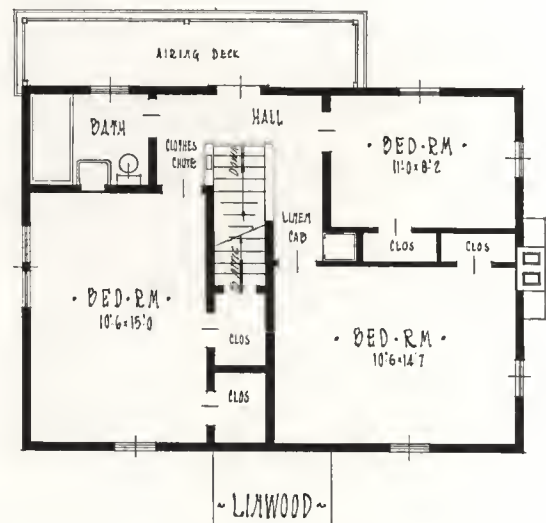

The Linwood

SIX rooms probably fit more economically and attractively into the two-story Colonial house than in any other. The Linwood bears out this belief. Upstairs, two closets are found

in the master bedroom, with an attic stairway rising from one. The Linwood sets on a foundation of less size than expected; and for all the room within, it meets a modest budget.

~ FIRST-FLOOR-PLAN ~

~ SECOND-FLOOR-PLAN ~

Classification 967 - 070

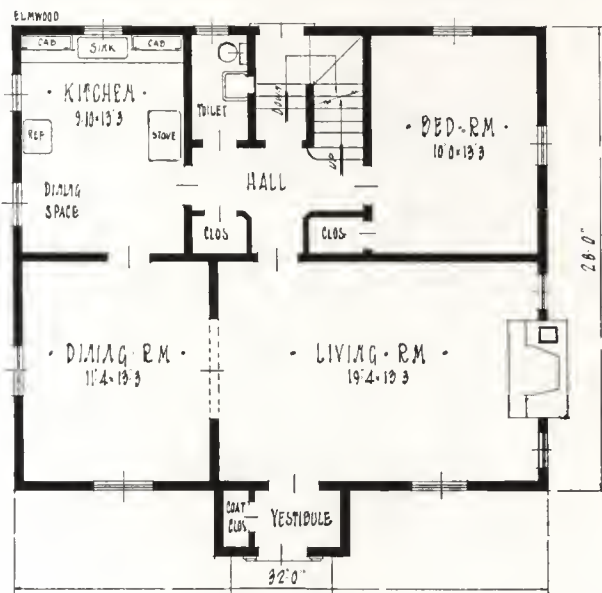

Six Rooms

20,250 Cubic Feet

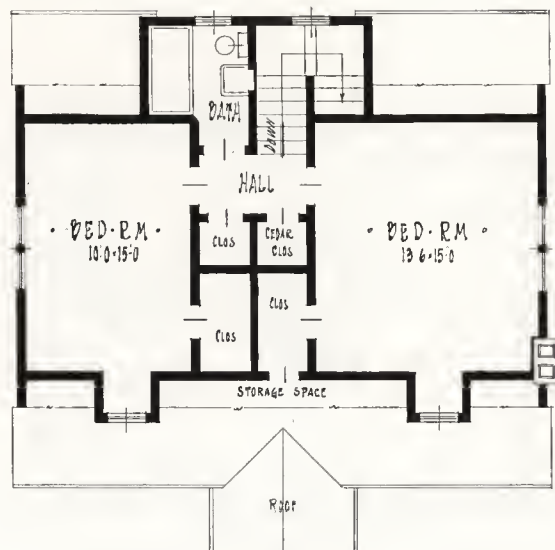

The Elmwood

CAPE COD character and space economy have been particularly well designed in the Elmwood. The entrance hall opens into a large and well proportioned living room which has an

inviting fireplace. A third bedroom and lavatory on the first floor reduce stair climbing. Liberal closets include one cedar lined.

~ FIRST-FLOOR-PLAN ~

~ ELMWOOD ~
~ SECOND-FLOOR-PLAN ~

Classification 973 - 650

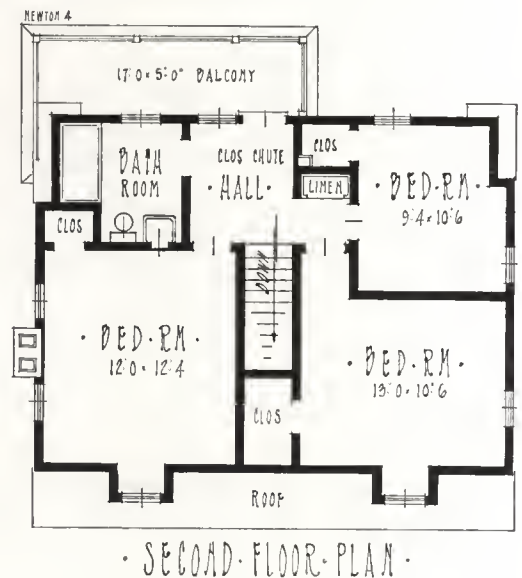

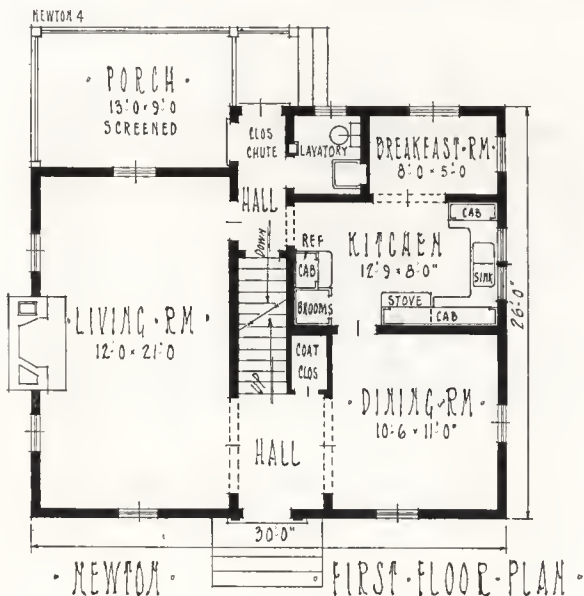

Six Rooms and Dinette

18,000 Cubic Feet

The Newton

COMFORT to the brim, warm personality, and unobtrusive thrift, mark the Newton as a characteristic Cape Cod. Details in full measure

include a screened porch. Upstairs, are three bedrooms — one more than usual in a Cape Cod.

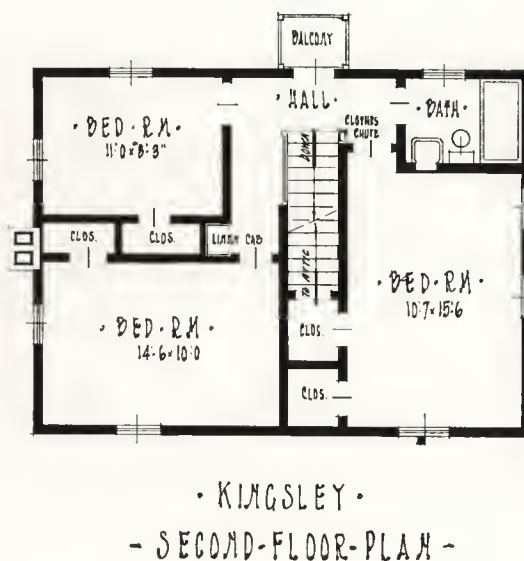

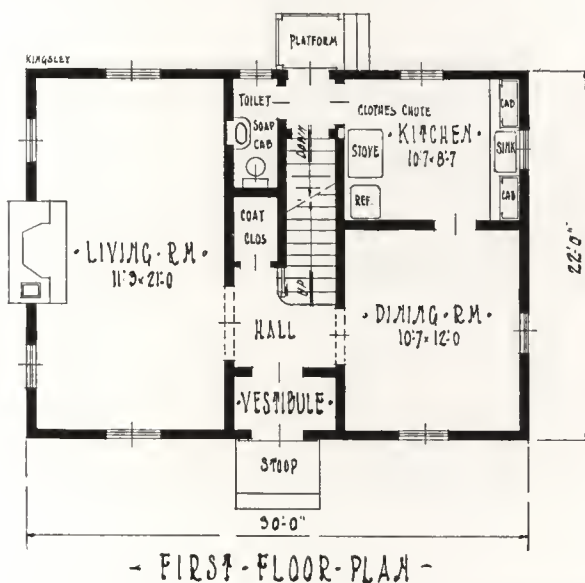

Six Rooms

19,150 Cubic Feet

The Kingsley

FULL of elbow room, in American Colonial thrift, the Kingsley occupies but small foundation space nevertheless. It stands out in dignity and charm. Generous in space, the master bedroom even has an extra closet so that

the master will surely have one. A downstairs lavatory and upstairs airing deck are characteristic conveniences. This is a fine home, yet within the medium price class.

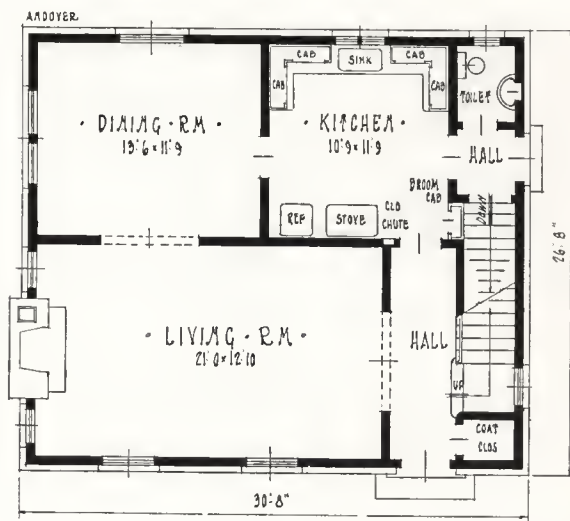

Seven Rooms

23,600 Cubic Feet

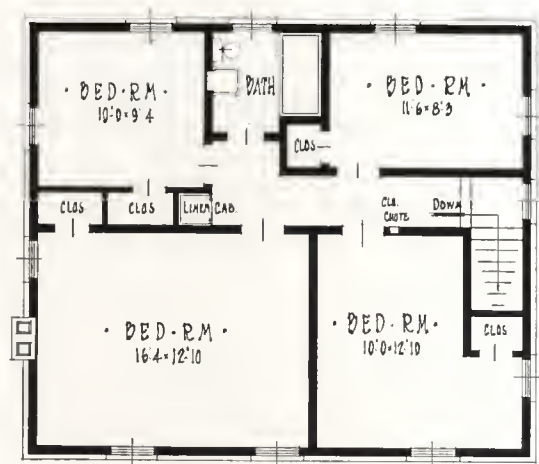

The Andover

THE substantial brick Colonial will outlast any as an investment in home satisfaction and comfort. The Andover provides every convenience and liberal room sizes without a foot of waste space. Four bedrooms make this a

permanent family home. The kitchen is especially attractive, with ample cabinets and thorough arrangement of equipment. The Andover is rich in appearance and construction merits.

~ FIRST-FLOOR PLAN ~

~ ANDOVER ~
~ SECOND-FLOOR PLAN ~

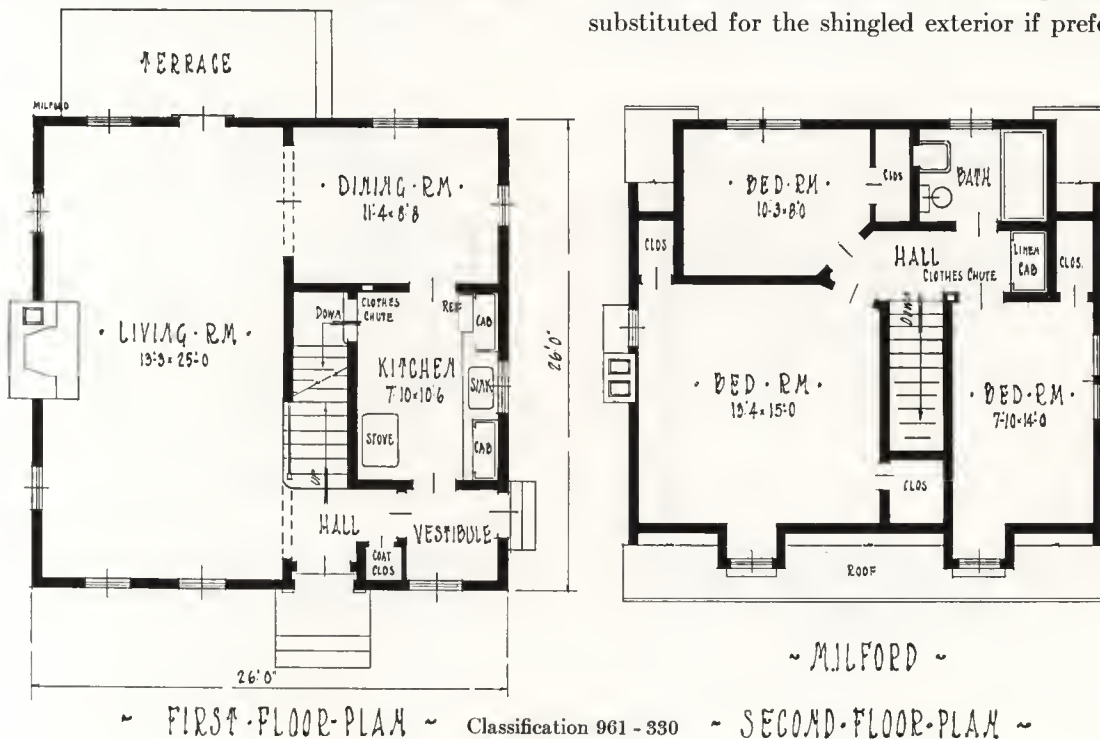

Six Rooms

16,200 Cubic Feet

The Milford

IN TYPICAL Cape Cod thrift, the Milford is a large capacity home in a small package.

The low cost is most unusual for the number of well planned rooms afforded. Siding may be substituted for the shingled exterior if preferred.

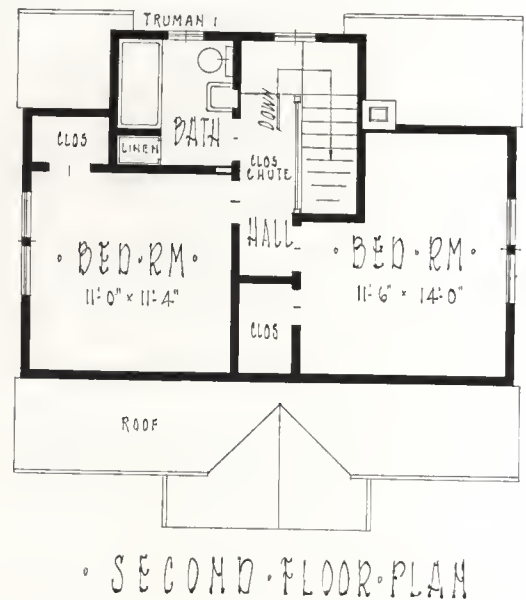

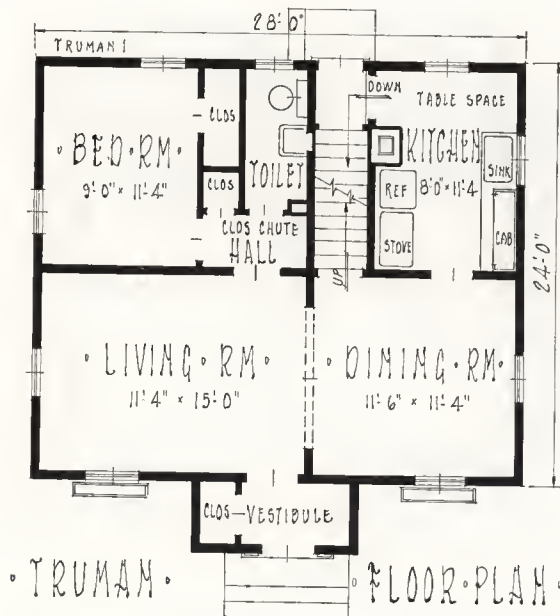

Six Rooms

15,700 Cubic Feet

The Truman

THE always popular semi-bungalow is capably handled in the Truman. In spite of low cost, here is the desirable downstairs bedroom with an adjacent toilet, and upstairs are

two more bedrooms and the bath. Nothing is overlooked in the way of closets, and table space in the kitchen simplifies family dining. Here is the home you have cherished in your dreams.

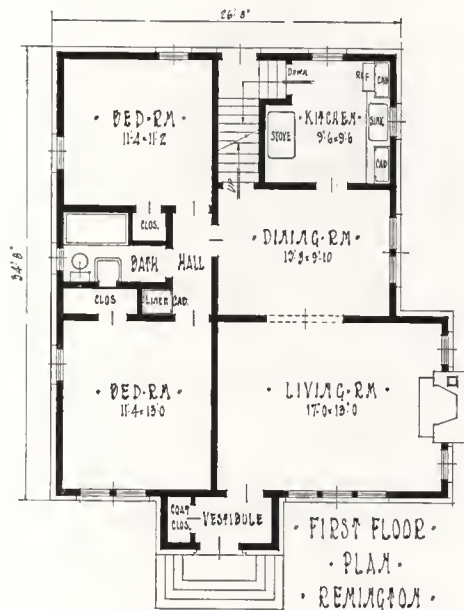

The Remington

FIVE ROOMS

21,900 CUBIC FEET

STURDY character and value of the Remington are reflected by the brick exterior and stone trim of this economical English bungalow.

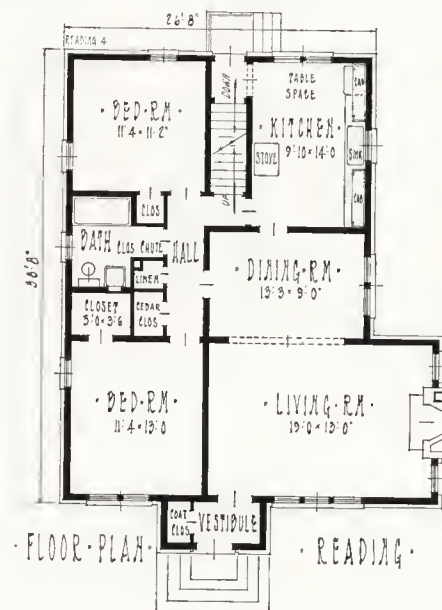

Classification 961 - 230

The Reading

FIVE ROOMS

25,800 CUBIC FEET

ONLY four feet added to the Remington permits a longer kitchen, an extra closet, and hall reaching stairs and kitchen from bedrooms.

Classification 965 - 980

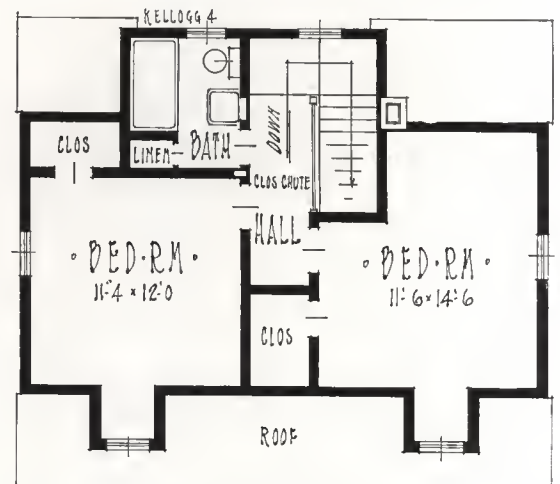

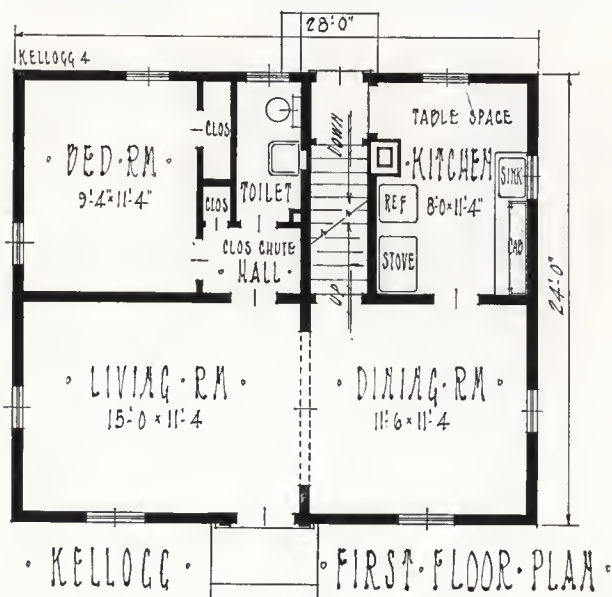

Six Rooms

16,100 Cubic Feet

The Kellogg

A GIFTED touch to the gables and entry detail gave the Kellogg its individuality as a Cape Cod. Extra values: bedroom on the ground floor

(a rare feature, frequently desired), downstairs lavatory, and ample room sizes despite frugal dimensions overall. Good sale or loan value.

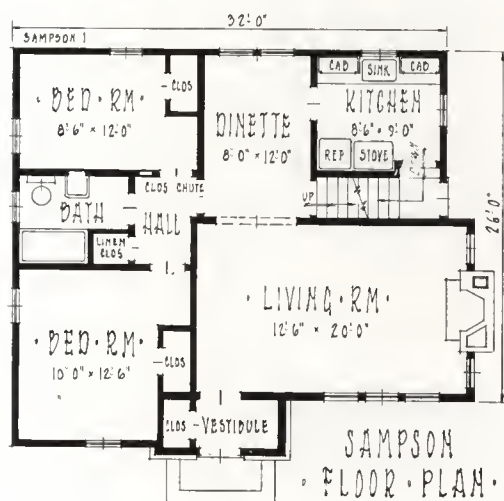

The Sampson

FIVE ROOMS

20,600 CUBIC FEET

THIS exterior of stucco and clapboards is in harmonious contrast to the brick entrance which houses a vestibule. In keeping is the large living room with a pleasant fireplace.

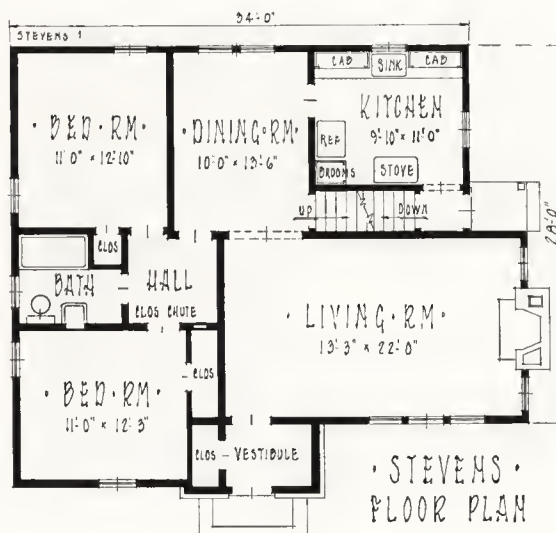

Classification 153-881

The Stevens

FIVE ROOMS

24,500 CUBIC FEET

EVEN more capacious is the Stevens, which has a dining room in place of the dinette of the Sampson. A large attic is ever welcome storage space, and provides for expansion.

Classification 160-841

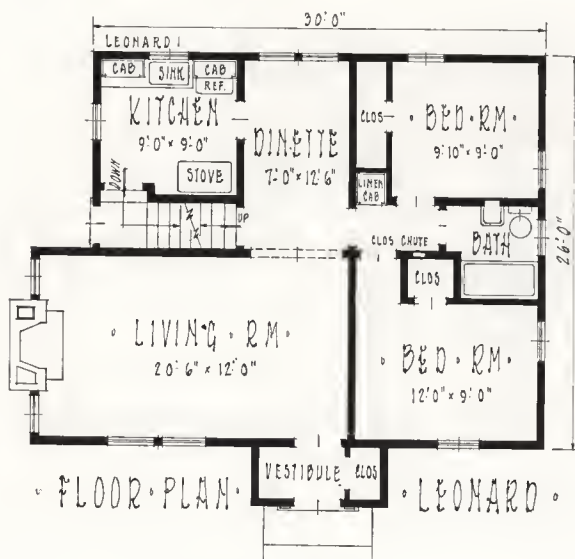

The Leonard

FIVE ROOMS

18,900 CUBIC FEET

THE spacious, well-lighted living room of the Leonard, with its ever desirable fireplace, will truly be your family center. The vestibule with an ample coat closet strikes a pleasing note.

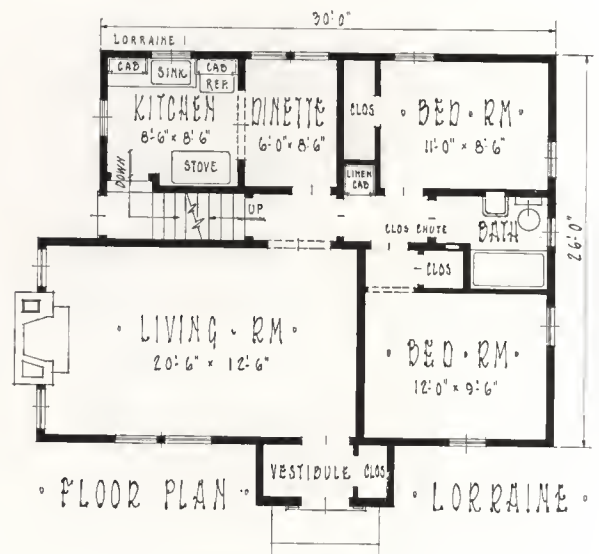

Classification 147-061

The Lorraine

FIVE ROOMS

19,413 CUBIC FEET

WITHOUT wasting a foot of space, the Lorraine segregates the dinette from the living room, a feature often sought for. A large attic makes this a real family home.

Classification 147-341

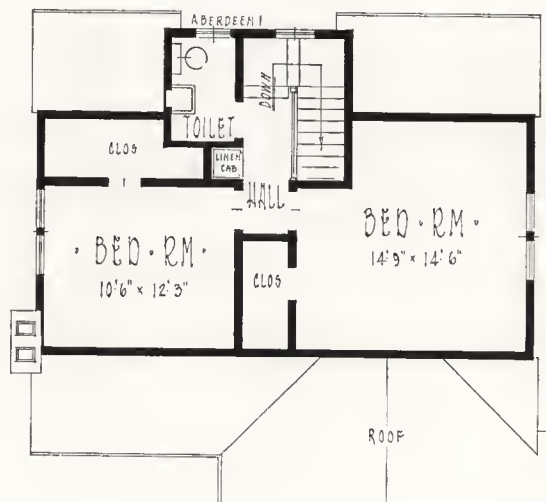

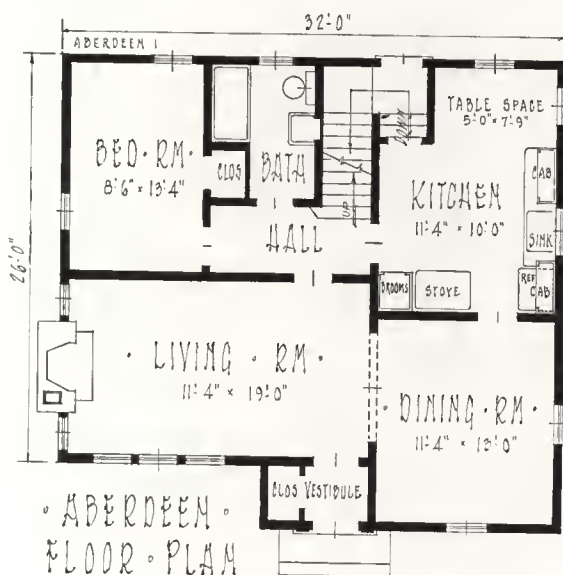

Six Rooms

21,300 Cubic Feet

The Aberdeen

AT LAST you have found a semi-bungalow with the ground floor you have always called ideal! The long living room not only has large, airy windows, but a fireplace as well. Down stairs is a bedroom with a bath, and the

two bedrooms upstairs have a toilet. Closets abound where they are needed most, and the convenient back stair hall is a daily boon to the occupants.

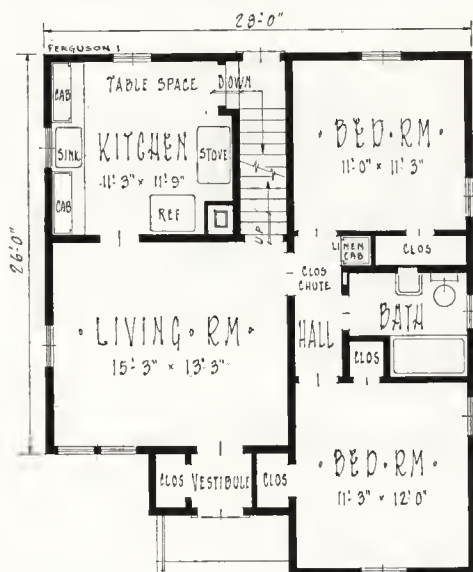

The Ferguson

FOUR ROOMS

19,300 CUBIC FEET

Low in cost but high in comfort is this charming version of the Colonial bungalow. The four rooms in a minimum of space provide surprising livability.

FLOOR PLAN FERGUSON

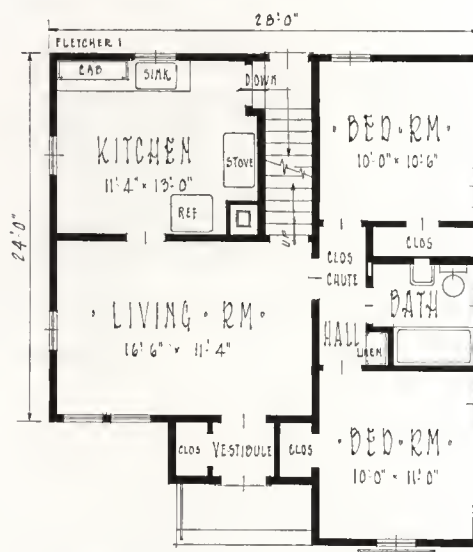

Classification 147-241

The Fletcher

FOUR ROOMS

18,000 CUBIC FEET

THE Fletcher is made to order for the home-maker who yearns for a larger kitchen. By reducing the size of the bedrooms slightly, this design reaches the pinnacle of economy.

FLOOR PLAN FLETCHER

Classification 144-821

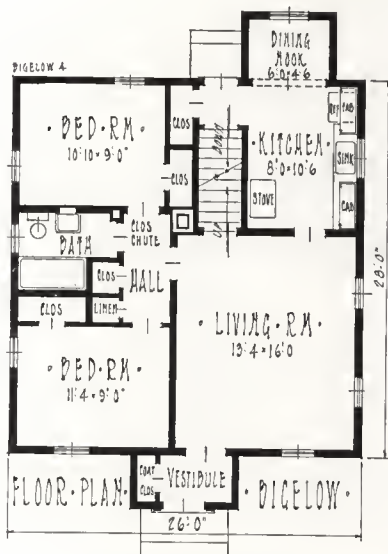

The Bigelow

FOUR ROOMS

17,100 CUBIC FEET

NO MERE bungalow, the Bigelow glories in Colonial treatment as in the gable trim. But plain economy rewards its choice. The attic may be finished later.

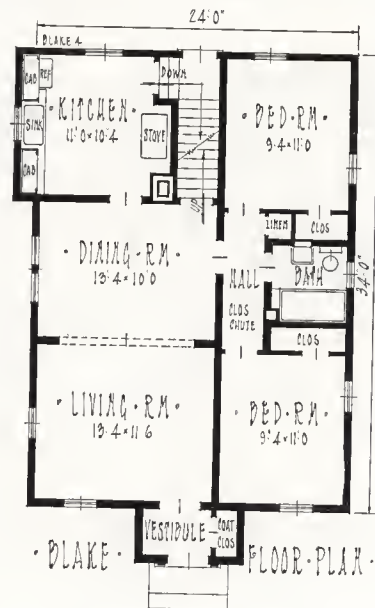

Classification 943 - 720

The Blake

FIVE ROOMS

18,800 CUBIC FEET

ESSENTIALLY a twin of the Bigelow, this plan is longer, making room for a dining room. Kitchen space has been widened. Suitable for a narrow lot.

Classification 947 - 990

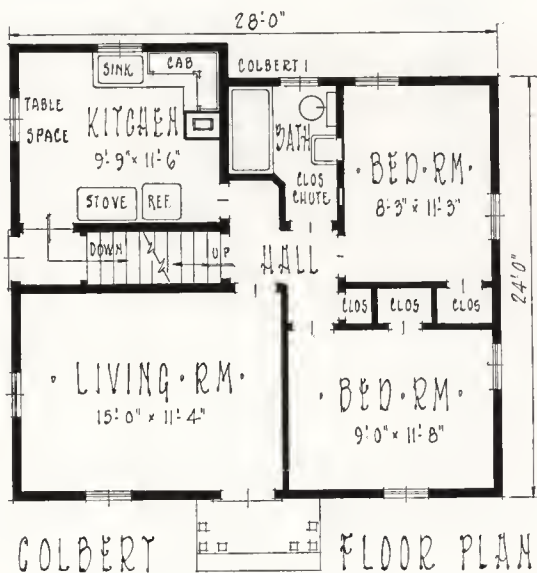

The Colbert

FOUR ROOMS

15,500 CUBIC FEET

THE simplicity of this Cape Cod cottage with its genial shutter treatment will make itself a niche in your heart and that of your friends. A handy attic renders the Colbert adaptable to your every need.

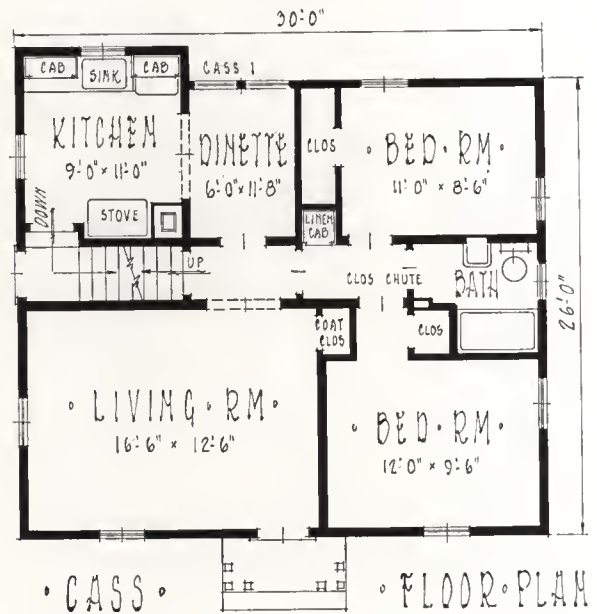

Classification 140-341

The Cass

FIVE ROOMS

18,200 CUBIC FEET

THE rooms of the Colbert have been enlarged and a dinette added to attain the splendid result of the Cass. The additional closets, the forethought of design, belie its economy.

Classification 145-221

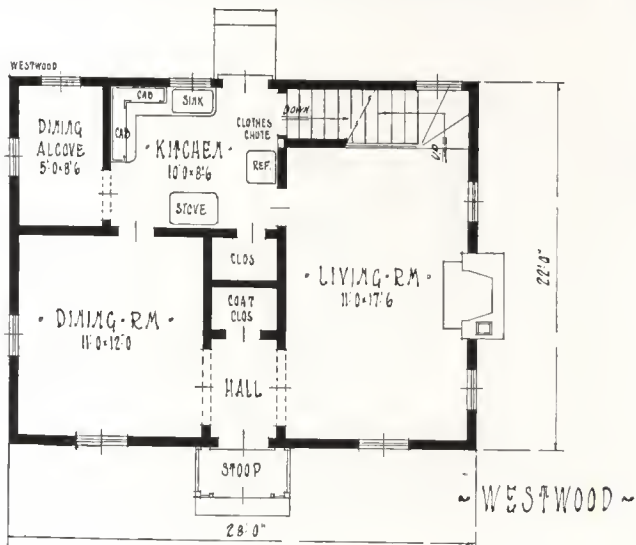

Five Rooms and Dining Alcove

14,800 Cubic Feet

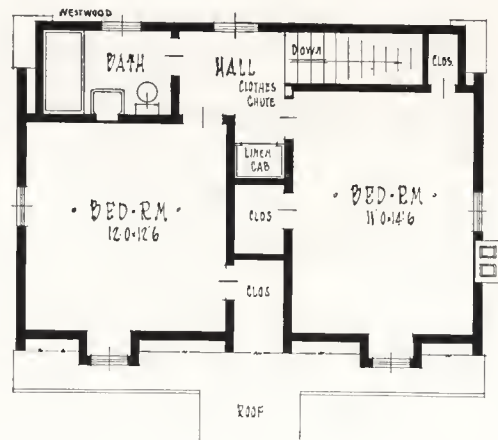

The Westwood

UNUSUAL entrance treatment gives the Westwood individual character. The spacious living room is completed by the fireplace. An extra kitchen closet is but one of the many large

closets planned for the housewife who has despaired of enough closet space. In addition to the dining room, a well lighted dining alcove opens off the kitchen.

~ FIRST-FLOOR-PLAN ~

~ SECOND-FLOOR-PLAN ~

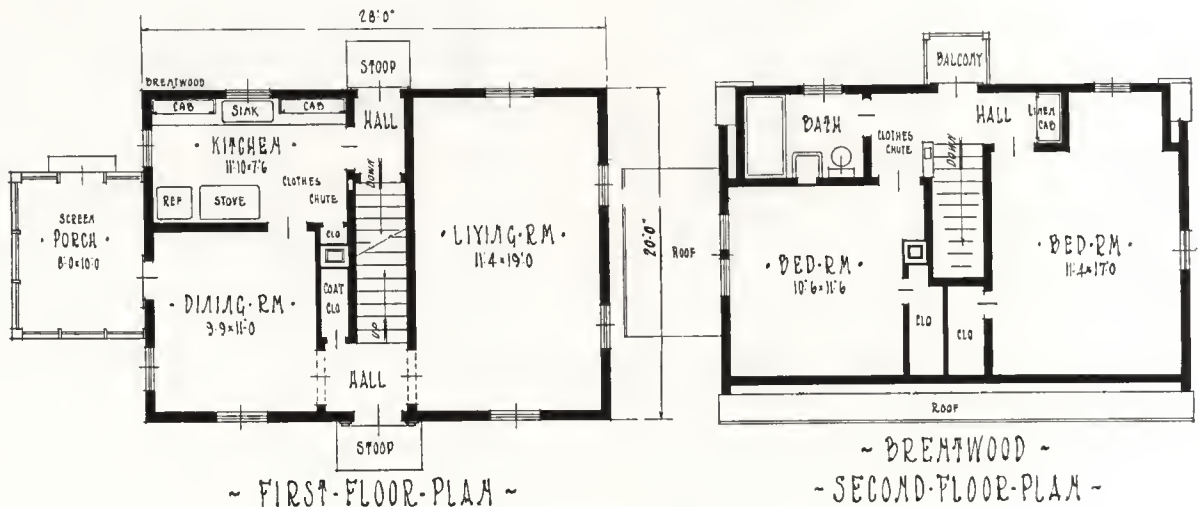

Five Rooms and Porch

14,900 Cubic Feet

The Brentwood

HERE is a house planned for the home loving family. The inviting screened porch blends into the lines of the house design. Natural simplicity of the Cape Cod style explains its attractive architecture. The living room size is

worthy of attention, windows on three sides. The Brentwood is exceptionally complete and attractive considering its dimensions and extremely low building cost.

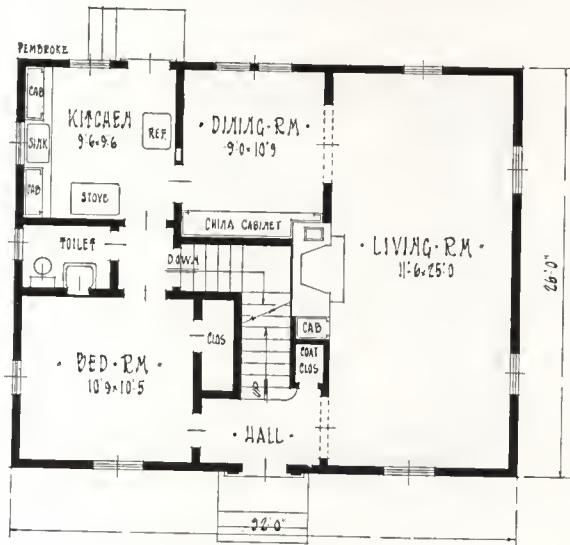

Six Rooms

18,300 Cubic Feet

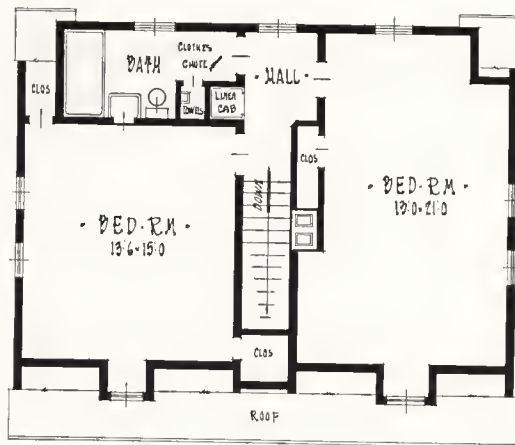

The Pembroke

THE well-known economy of the appealing Cape Cod type has never been better demonstrated than in the Pembroke. The great living room features an inside fireplace with a unique

cabinet alongside. A study or playroom may be planned as an alternative to the downstairs bedroom. Plentiful closets and step-saving conveniences are thoughtfully provided.

- FIRST-FLOOR-PLAN -

- PEMBROKE -
- SECOND-FLOOR-PLAN -

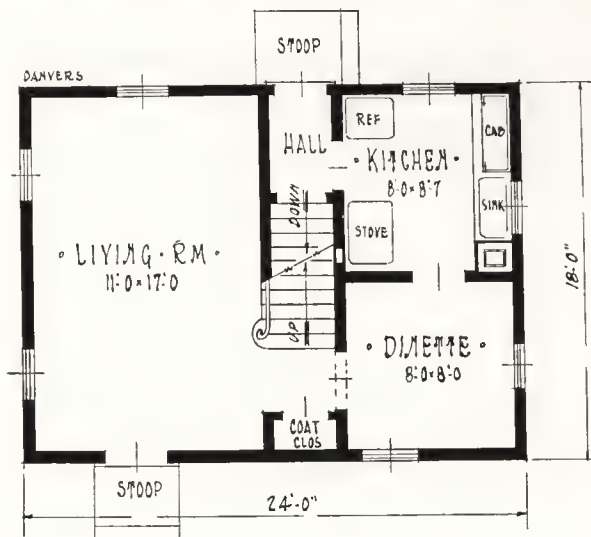

Five Rooms

11,260 Cubic Feet

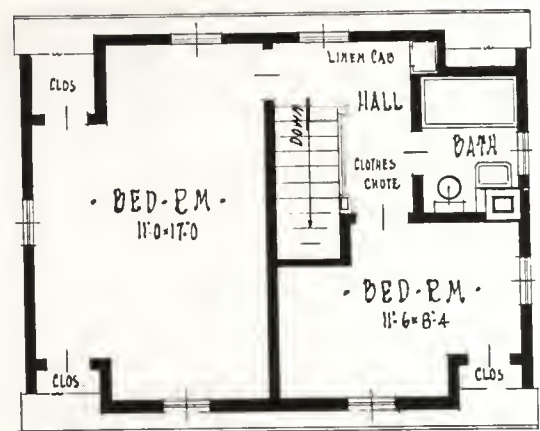

The Danvers

THE sturdy charm of the Dutch Colonial richly deserves its lasting popularity. Traditional is the compact economy of this type of construction. It is remarkable that a house of these limited dimensions can have such large

rooms. Every foot of space has been carefully utilized for utmost convenience. A great deal of value and living comfort have been built into this extremely low cost design.

~ FIRST-FLOOR-PLAN ~

~ DANVERS ~
~ SECOND-FLOOR-PLAN ~

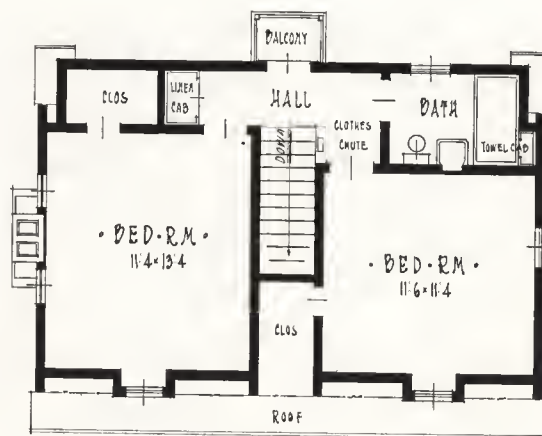

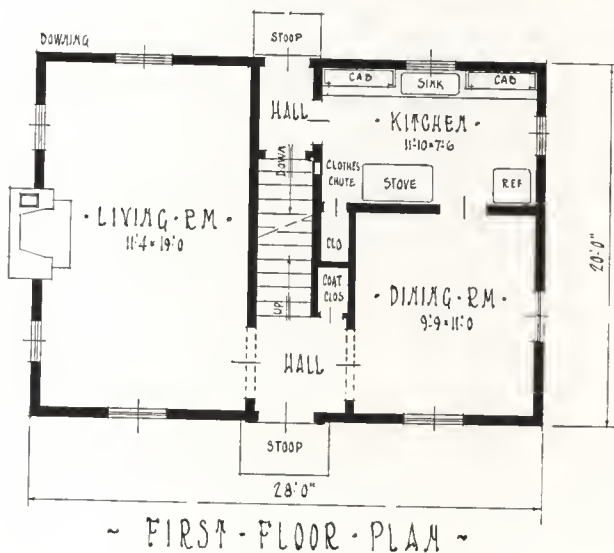

Five Rooms

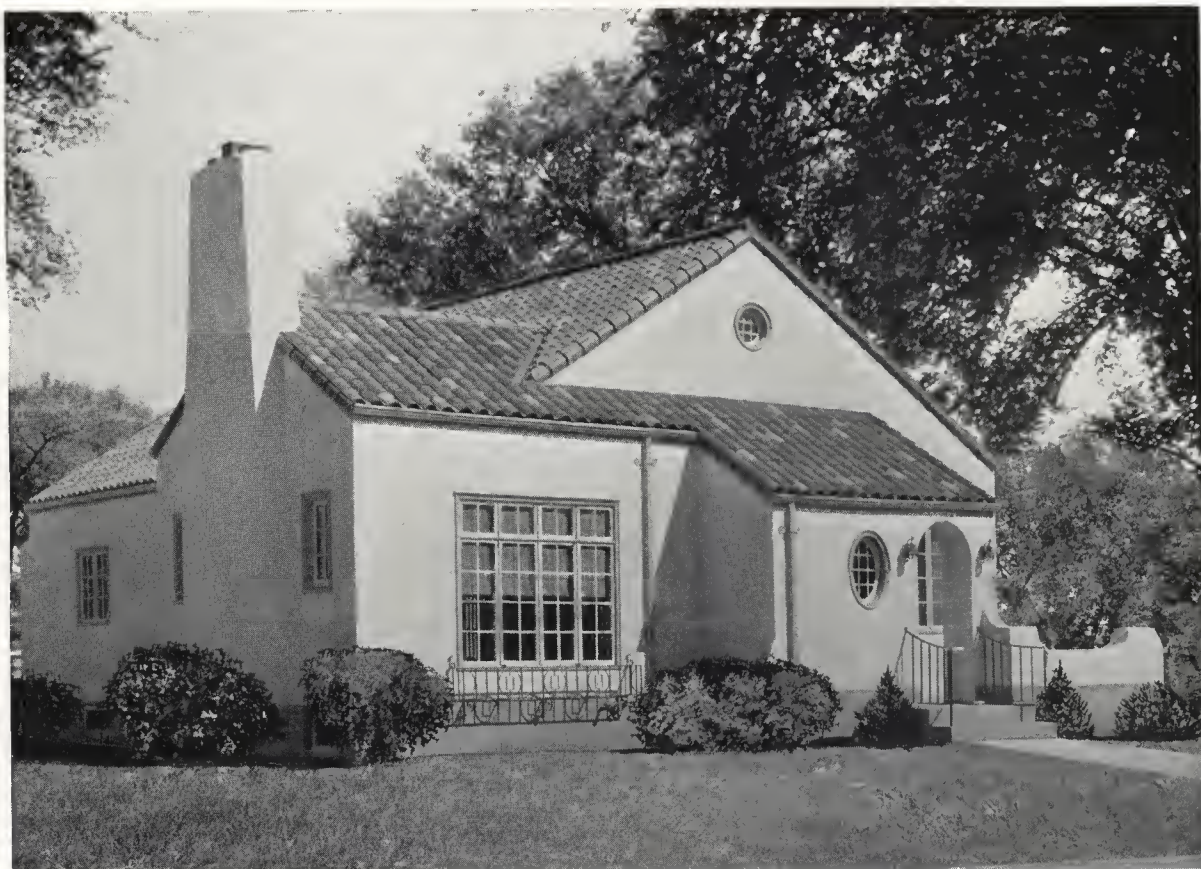

14,780 Cubic Feet

The Downing

AN EXCEPTIONALLY attractive example of Cape Cod design, the Downing offers five well arranged rooms, each comfortable in size. The center stairway gives balance and convenience to the house, making the plan compact with no

waste space. Especially well planned, the kitchen even has a closet. The worth of the Downing appears far more than the actual construction cost. It is truly a fine home.

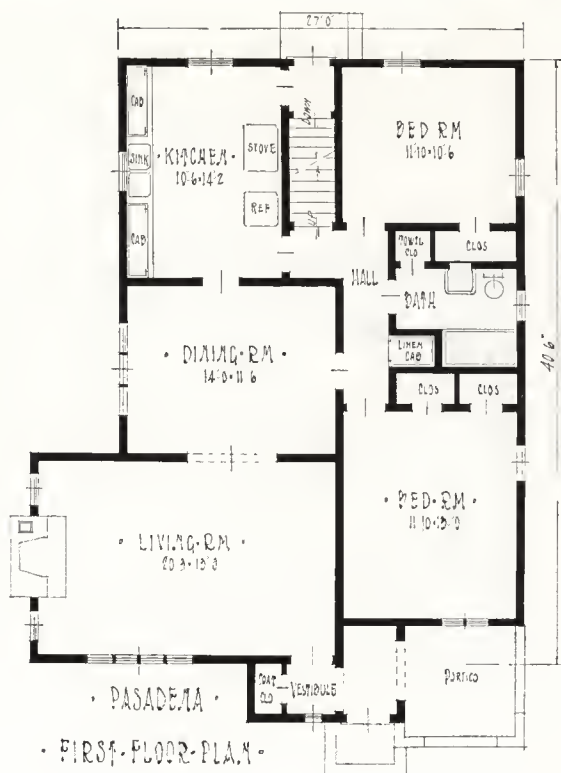

Five Rooms

24,500 Cubic Feet

The Pasadena

THE Spanish influence has been adapted most acceptably in the Pasadena bungalow. Tile roof, portico, wrought iron railing and flower box, and porthole windows lend convincing Spanish atmosphere.

Conceived in notable efficiency, room placement merits comment. Bedrooms are to one side, and quickly reached through a central hall with doorways from both kitchen and dining room. Of course, a fireplace graces the living room.

The Pasadena is profuse with closets, with two in the front bedroom.

Here is a home that really belongs wherever located, neatly attractive without extravagant details.

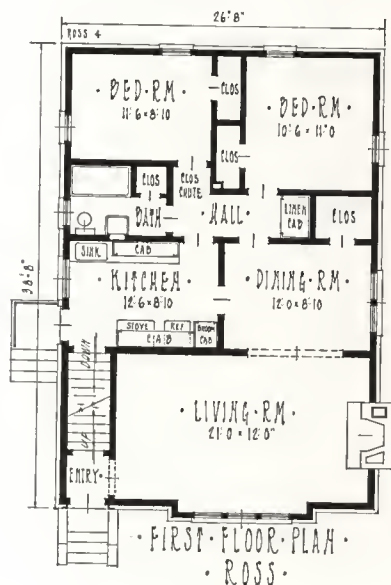

The Ross

FIVE ROOMS

22,550 CUBIC FEET

This bungalow has an English accent . . . its half-timbered gable with leaded window. Very compact arrangement. Stairs lead to the attic, which is in reserve for future bedrooms.

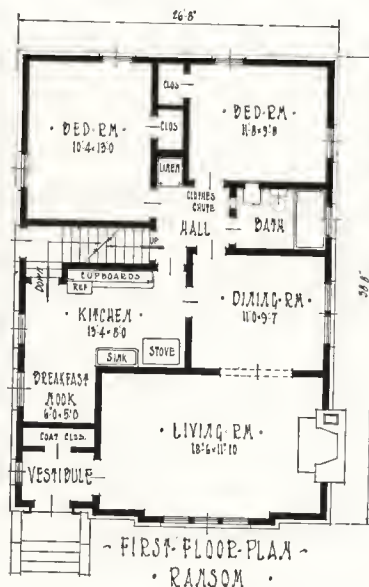

Classification (961-260)

The Ransom

FIVE ROOMS

22,550 CUBIC FEET

The Ransom is very similar to the Ross. Here, the attic stairway has been shifted to the bedroom hall, reducing emphasis. A breakfast nook has been added.

Classification (961-230)

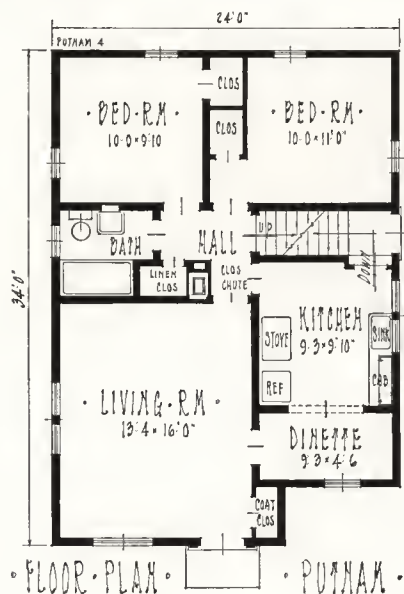

The Putnam

FIVE ROOMS

17,100 CUBIC FEET

AUTHENTIC in charm as well as in thrifty design, the Putnam is typically Colonial. The extended roof line, entry detail and landscape window are outward evidence, with today's interior.

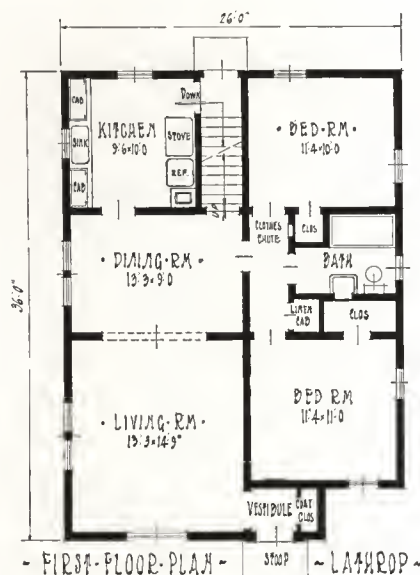

Classification 943 - 700

The Lathrop

FIVE ROOMS

20,100 CUBIC FEET

FOR those insisting upon a dining room, the Putnam has been rearranged to become the Lathrop. All rooms are in good proportion, Attic stairs are in place.

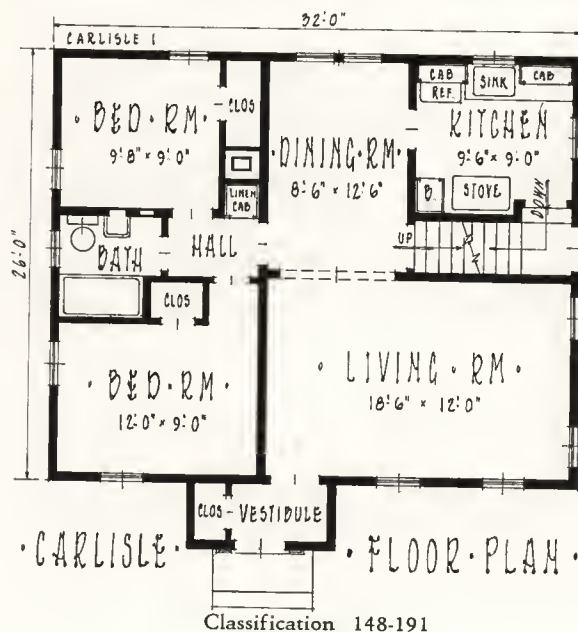

Classification 948 - 010

The Carlisle

19,700 CUBIC FEET

THE Carlisle is more ample than the Carter, and the dining room lends dignity and grace. A roomy attic is easily accessible, providing adequate storage space.

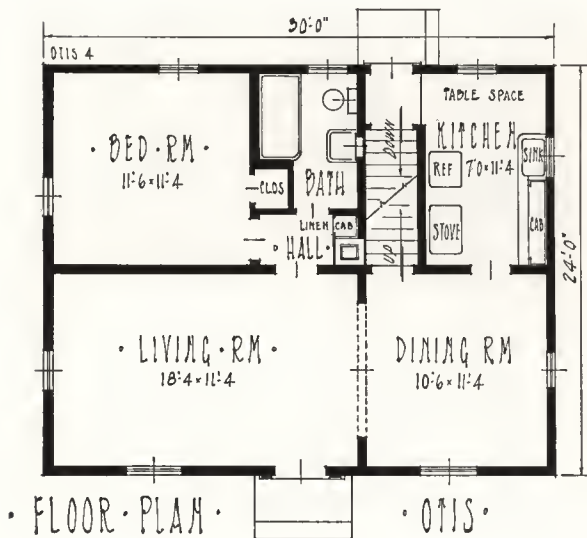

The Otis

FOUR ROOMS

15,300 CUBIC FEET

A DELIGHTFUL air is attached to the Otis by the interesting eave treatment over the entrance of this Cape Cod variation. A true low-cost home.

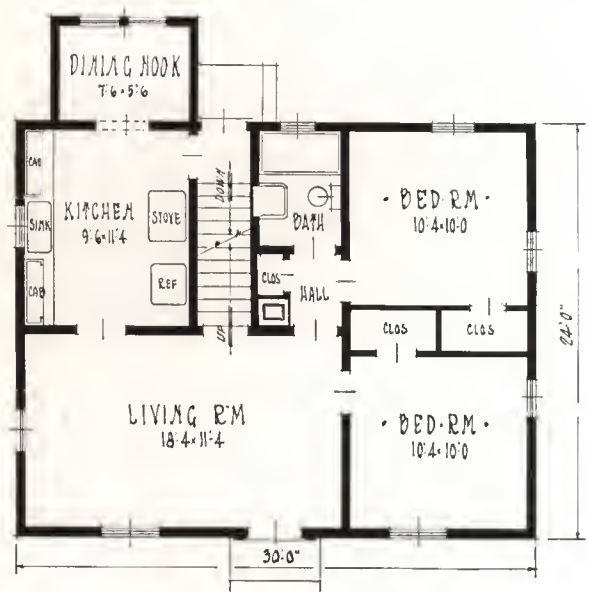

Classification 941 - 620

The Oakdale

FOUR ROOMS AND NOOK

15,950 CUBIC FEET

A DINING NOOK in the Oakdale replaces the dining room of the Otis, allowing a second bedroom without substantial changes in dimensions.

- FIRST-FLOOR-PLAN - OAKDALE -

Classification 944 - 080

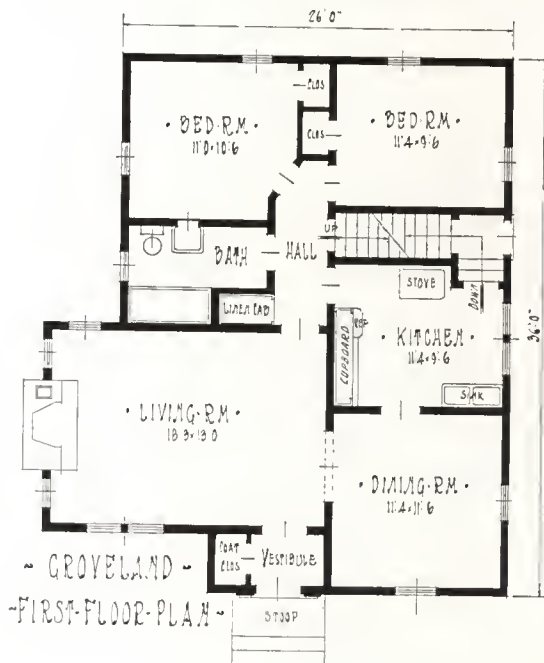

The Groveland

FIVE ROOMS

21,780 CUBIC FEET

This handsome, steep-roofed home is unusually well arranged, without extravagant frills. It appeals to a growing family.

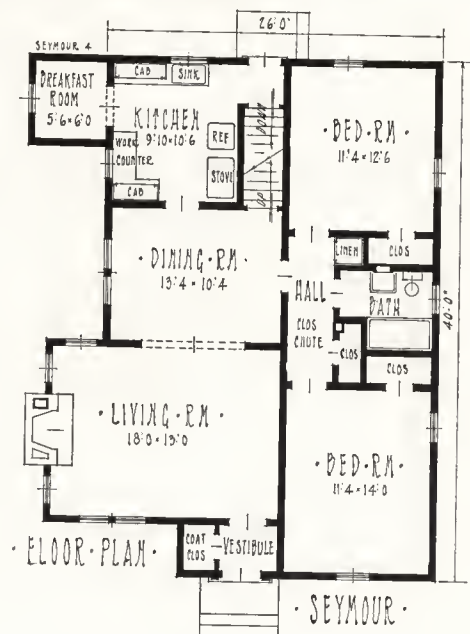

Classification 954 - 550

The Seymour

FIVE ROOMS

25,350 CUBIC FEET

Just move the bedrooms of the Groveland to the side of the house, add a breakfast room, and you have the Seymour.

Classification 959 - 080

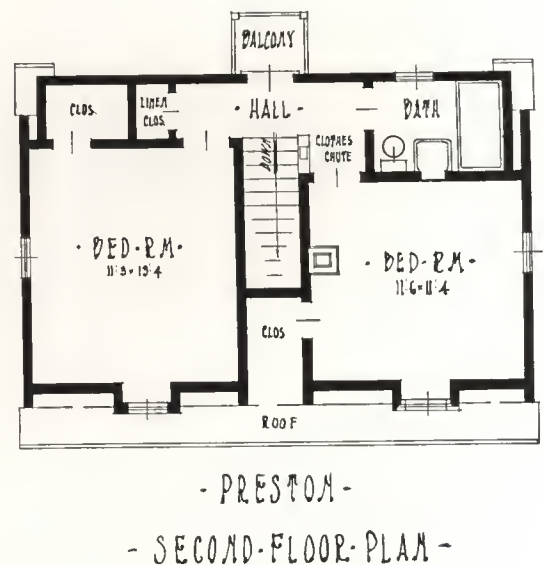

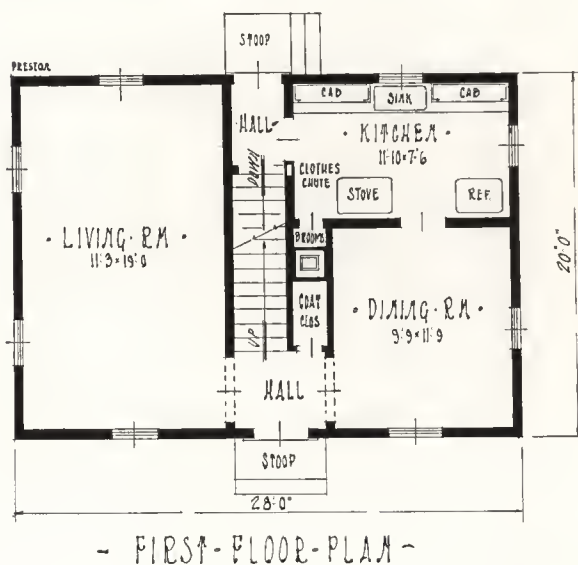

Five Rooms

14,500 Cubic Feet

The Preston

THIS Cape Cod is just the right size for a small family, and typical of its type, can be built at a remarkably low cost. Complete in details with careful interest in convenience, and

liberal in size, the Preston has been well planned. The ample living room occupies all of one side of the house.

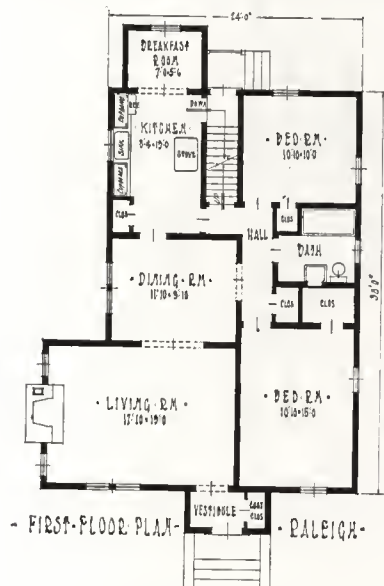

The Raleigh

FIVE ROOMS

22,200 CUBIC FEET

A PERFECT blending of Colonial design with practical family needs is fully expressed by the Raleigh. Expansion to attic anticipated.

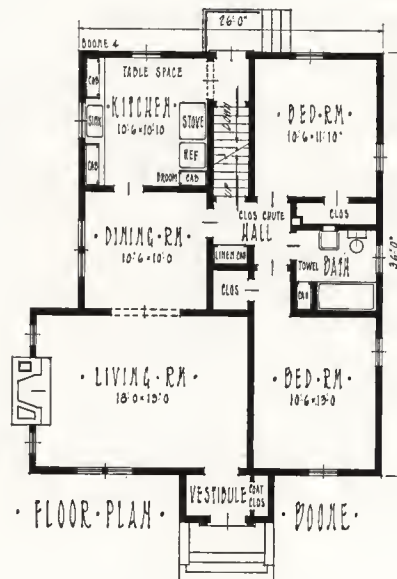

Classification 956 - 270

The Boone

FIVE ROOMS

23,200 CUBIC FEET

LIKE the Raleigh, but room dimensions slightly changed and breakfast room dropped. The Boone has no waste space.

Classification 956 - 350

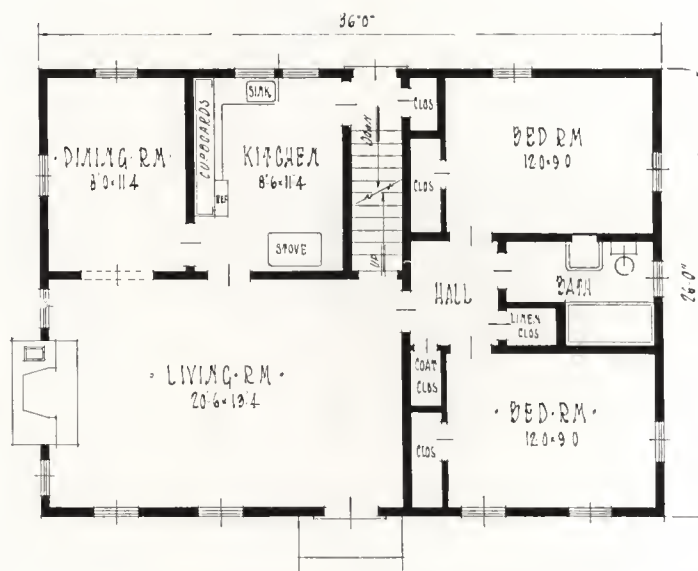

Five Rooms

19,650 Cubic Feet

The Norwalk

THE Cape Cod is essentially a fine American home, rich in its simplicity. A man - sized living room graces the front, and through an arch the dining room overlooks the garden or play-yard, which also may be seen from the kitchen through windows over the sink. A feature of the exposure is that it may face South, East or West. Besides the two bedrooms, a full size attic may be converted when needed. The Norwalk is a graceful home for graceful living.

- FIRST FLOOR PLAN - NORWALK -

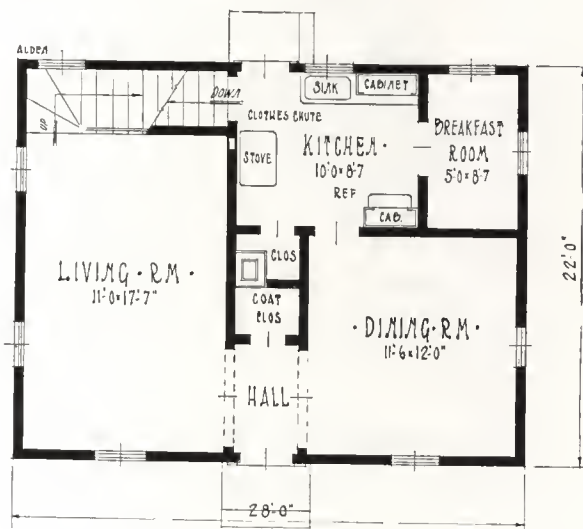

Five Rooms and Breakfast Nook

16,000 Cubic Feet

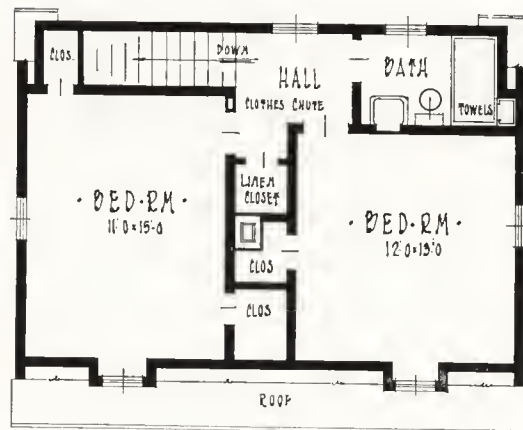

The Alden

INTERESTING in its neat simplicity, the Alden is an especially thrifty Cape Cod design. Despite the small ground space required, five well planned rooms, plus bath and breakfast room, testify to the compact economy of the house.

Appreciated details such as the clothes chute, linen closet, towel cabinet in the bathroom, kitchen closet and clothes closet in the entrance hall, demonstrate that no skimping has contributed to the low building cost.

- FIRST-FLOOR-PLAN -

- ALDEN -
- SECOND-FLOOR-PLAN -

The Elkins

FIVE ROOMS

21,500 CUBIC FEET

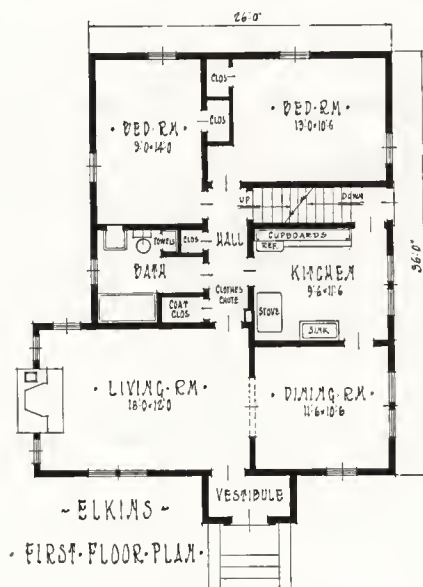

THE Elkins, as a splendid example of the Colonial bungalow, affords maximum home comforts without impractical decorative frills.

The Oliver

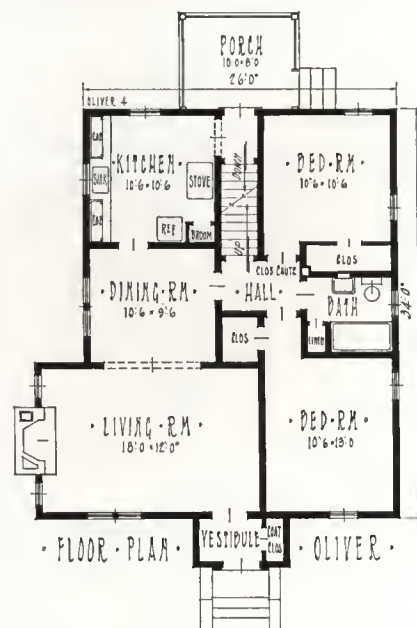

FIVE ROOMS

21,900 CUBIC FEET

WITH rooms following the exposure, plus a rear porch, the Elkins has been revised as the Oliver. Low-cost features remain.

Classification 956 - 980

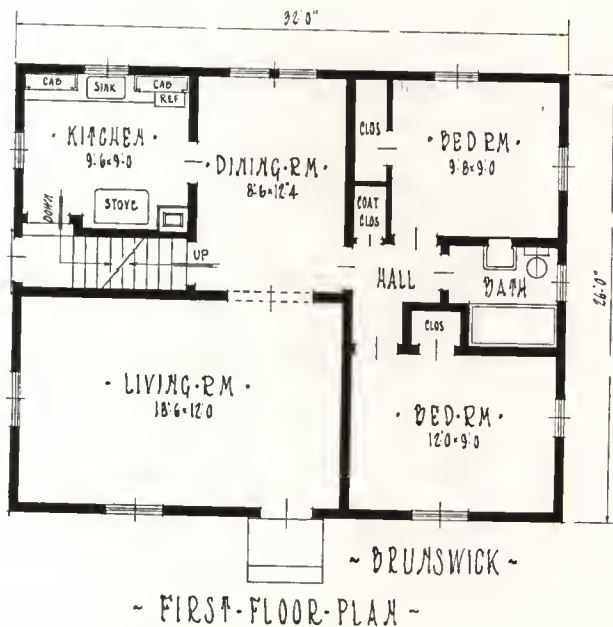

Classification 957 - 550

Five Rooms

18,300 Cubic Feet

The Brunswick

THIS inexpensive small home has Cape Cod charm. Nothing has been overlooked to make a complete home in every respect. The architectural style stresses simplicity which, after all, is the most enduring style. The archway from living room into dining room is attractive and enhances the comfort of size. A very pleasant kitchen has been designed with compact convenience. Attic room upstairs may be finished into bedrooms as required. The stairway is already provided, rising at the peak to avoid dormers. The lines of the Brunswick are neat and attractive, without a single extravagance. It is a splendid value for the low construction expense.

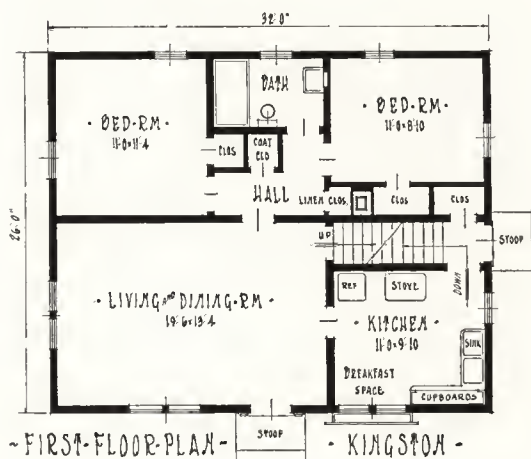

The Kingston

FOUR ROOMS

17,850 CUBIC FEET

THE fine simplicity of the Kingston contributes the combination living room and dining room, in answer to demand for spacious living room. The neatness of its Colonial style is matched by the rock-bottom cost of construction.

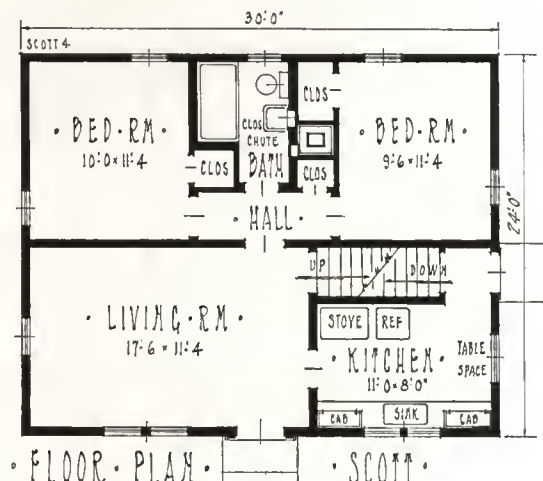

The Scott

FOUR ROOMS

15,150 CUBIC FEET

A SMALLER edition of the Kingston, no sacrifice of comfort and convenience has been made, despite reduction of overall dimensions. Almost anyone paying rent can afford to build the Scott. Its exterior is in good taste among much higher priced homes.

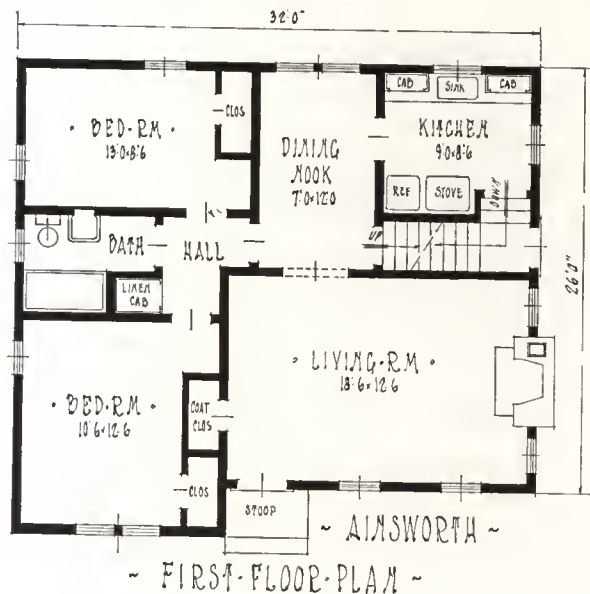

The Ainsworth

FIVE ROOMS

19,150 CUBIC FEET

AN IRRESISTIBLE Cape Cod, with all housework on one floor. The five-room Ainsworth is comfortably planned in splendid taste.

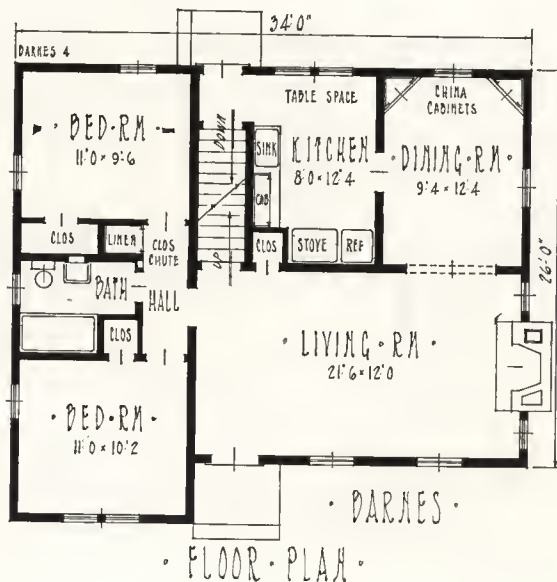

Classification 949 - 930

The Barnes

FIVE ROOMS

20,300 CUBIC FEET

ALTHOUGH only a trifle wider, the Barnes has a delightful dining room with corner cabinets and a longer living room.

Classification 953 - 250

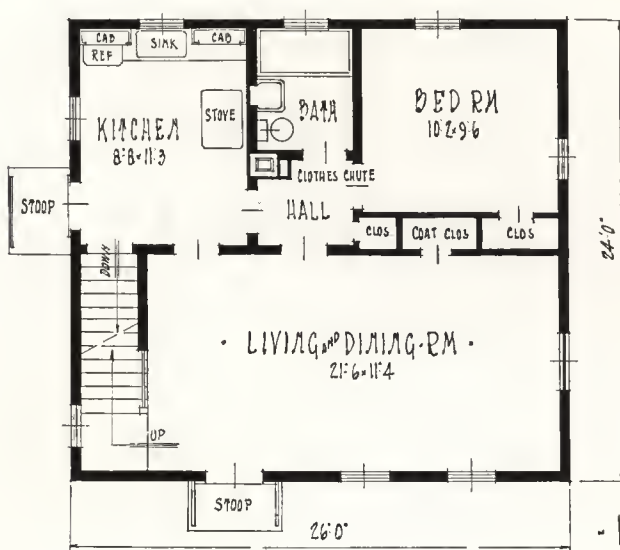

Five Rooms

13,700 Cubic Feet

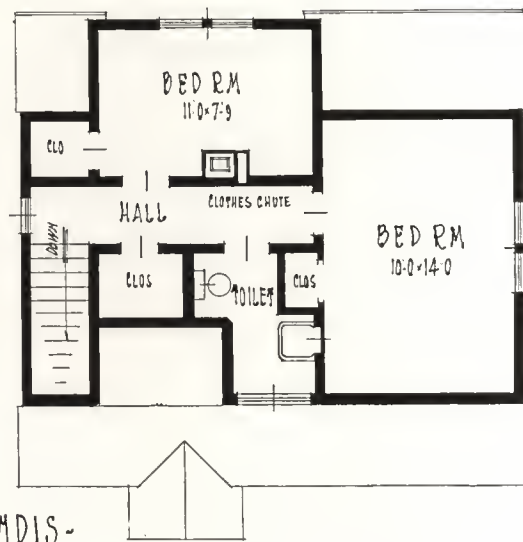

The Landis

THIS stucco bungalow is especially suitable for a large family of moderate means. Living room and dining room have been made into one

great room for maximum space. The Landis is recommended because it is handsome, yet plain, substantial and low in cost.

~ FIRST-FLOOR-PLAN ~

~ SECOND-FLOOR-PLAN ~

The Clayborne

FIVE ROOMS

17,800 CUBIC FEET

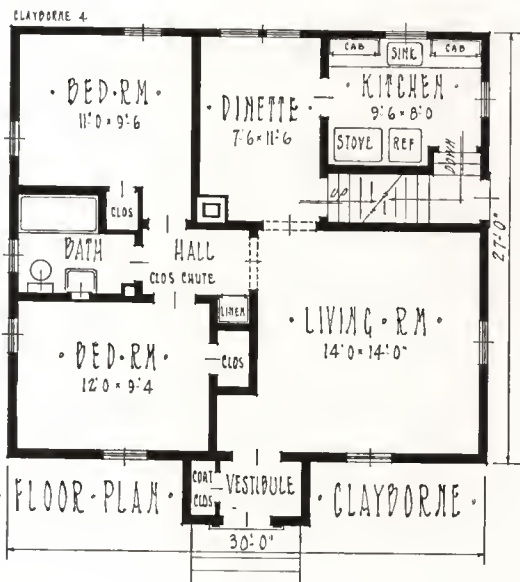

COLONIAL treatment has made a plain bungalow into a lovely home, especially for newlyweds. The attic may be finished.

The Clayton

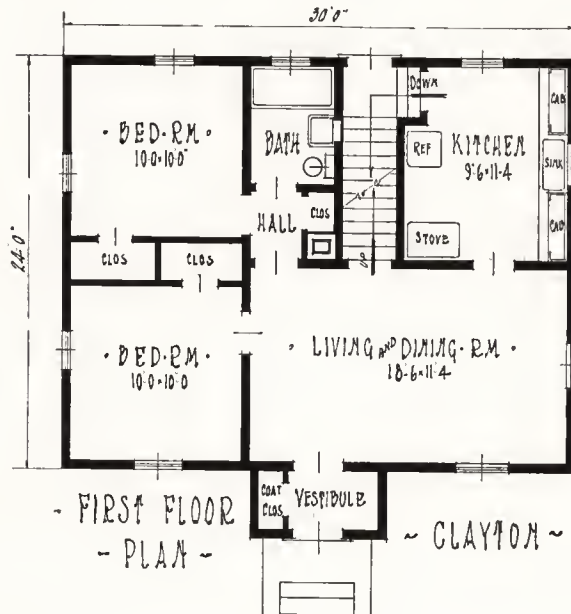

FOUR ROOMS

15,650 CUBIC FEET

A STRICT budget favors this revision. The Clayton omits the dinette, but has a larger kitchen and a grand living-dining room.

Classification 945 - 600

How to Obtain Blueprints

Working blue prints may be ordered through us, your lumber dealer. We are in position to get these detailed plans on very short notice.

Minor Changes in Plans

Slight alterations by the builder are easily made, noting them in the space provided in the specifications, thus making them part of your contract. Such changes might be: reversal of floor plans; addition or omission of fireplace or porches; substitution of French doors for arches;

re-arrangement of kitchen cabinets; inclusion of breakfast nook, etc.

Any questions concerning plans, approximate costs, or proper materials will be answered readily by us, your lumber dealer. Consult us freely.

Garage Plans

A Garage Plan Book has been prepared by the publishers of the Home Plan Book. In it you will find a garage matching the style of home you are building.
